Objective of the document

This document is scripted to help the site administrator of the Group Deal software in setting up the site by defining configurations as well as the usage of the software. The Group Deal user manual has been drafted from the point of view of a webmaster who is the site admin explaining the features available for the admin user, how they can control the features and the impact in user area after doing any changes to the settings. The manual explains the admin area in detail supported by screen shots for better understanding. All the procedures that are required for deals management from creating a deal to the sale of deal are explained in detail.

Admin Panel

The users have admin access is redirected to the admin panel once he/she has successfully logged in to the website. Admin user can control features of the website in Admin

- Click **Home** to go to the **Today's deal page**
- From Today's deal page the admin can return back to the admin panel by clicking admin in You are logged in as admin Logout message displayed in the Today's deal page
- Click **My account** to view and manage the account information of the admin user like profile page, deals, transaction etc.,
- Choose the desired city from the **city drop down**
- Choose the desired language from the **language drop down** to view the site in different language
- Click **Logout** to get logged out of the website
- Shows up the **Current time** and **Last Login time**

1 Site stats

A simple table that shows the entire information about the site which includes the users, companies, deals, transactions.

Figure -1 Site Stats

2 Users

The users page shows up the information about the users who have joined the website. The users are categorized based on the id (Face book users, twitter users etc.,) which they use to sign up.

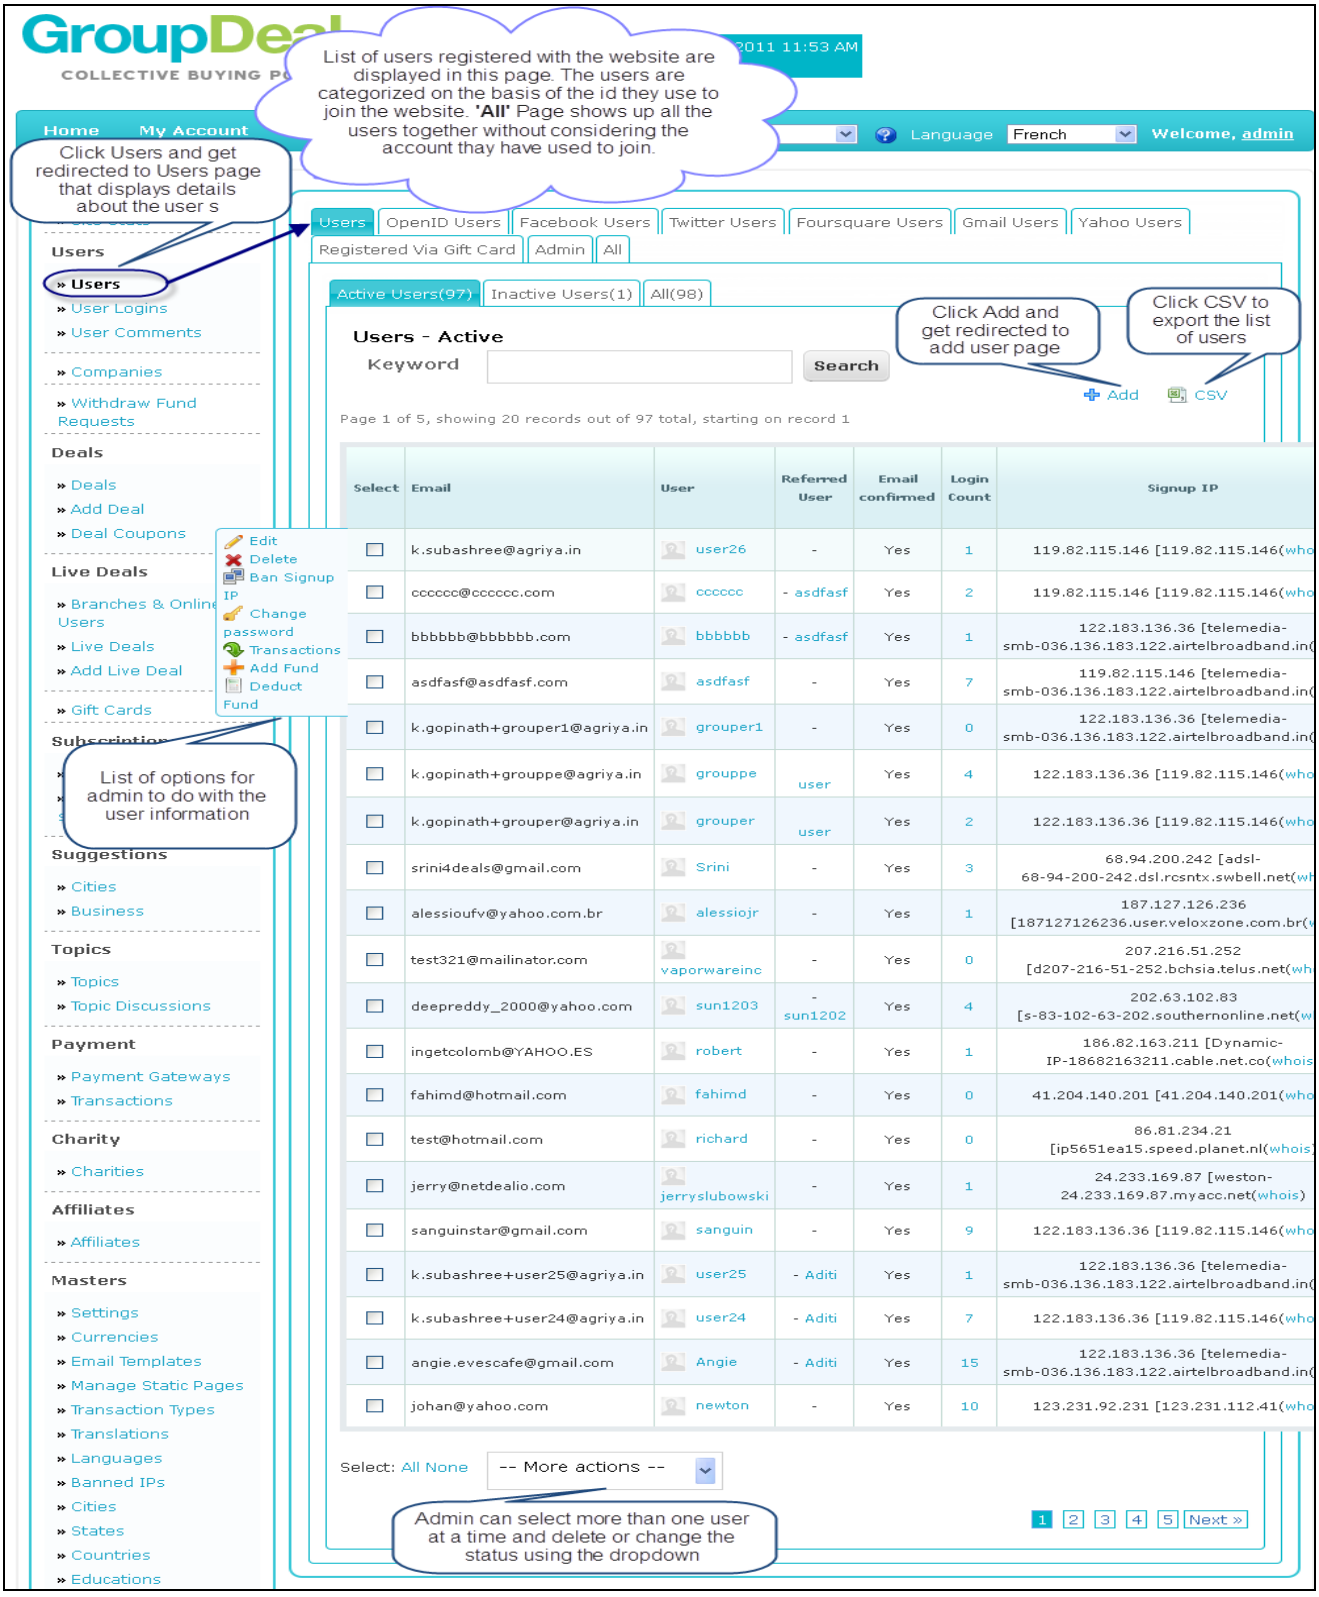
2.1 Users

Click users in the users menu. The active users page will be displayed. The number of active users, inactive users and both users together as All users are shown up in this page.

User Categories

The users are categorized according to the account they use to sign up. If a user joins the website using the **Sign Up** form the user is listed under **Users.** If a user have registered using his **Facebook** account his user information will be listed under **Facebook users**. Like Facebook the users can user their **Twitter** log in, **Foursquare**, **Gmail**, **Yahoo** id to become a member of the site.

If the user joins the website to use the gift card sent by his friend the user is listed under the category **Registered via Gift card**. **Admin** users are also listed separately. All users page shows information about all registered users together.



List of users registered with the website are displayed in this page. The users are categorized on the basis of the id they use to join the website. 'All' Page shows up all the users together without considering the account thay have used to join.

- Click view deal to preview the deal how it will display in the member end (Today's deal page)
- Using the More Actions drop down menu the admin can select a deal and change the status of the deal to **Pay to Company**.

5.1.7 Paid to company - The deals that are successfully tipped and the deal amount is paid to the company are listed under this category.

- Hover the mouse on a deal information to see the options to **Edit, Delete, list allocated coupons, clone deal, View discussions about the deal, View deal, quantity sold**
- Click **Clone deal** and get **redirected** to **add deal** page where all the information required to add a deal are already filled up. Choose the **Deal start date** and **end date**, **coupon start date** and **end date**. Admin can also do the needed changes like adding some more deal images, changing number of coupons,

5.1.8 Refunded - If the number of minimum purchases set by the company or admin for a deal is not achieved and reached the end date, the deal is said to be expired and the money will be refunded to the customers who have purchased the deal. Once the money is refunded those expired deals are listed as refunded deals.

- Hover the mouse on a deal information to see the options to **Edit, Delete, clone deal, View discussions** about the deal**, view deal, quantity sold.**
- Click **View deal** and get **redirected** to **deals page** where admin can **preview** how the deal will appear in **the Today's deals page**

5.1.9 Canceled- Deals that are canceled by the company are listed as canceled deals

- Hover the mouse on a deal information to see the options to **Edit**, **Delete**, **list allocated coupons**, **clone deal**, **View discussions** about the deal, **view deal**, **quantity sold**.
- Using the More Actions drop down menu the admin can select a deal and change the

status of the deal to **Open**.

5.1.10 Rejected - Deals that are rejected by the admin

- Hover the mouse on a deal information to see the options to **Edit**, **Delete**, **list allocated coupons**, **clone deal**.
- Using the More Actions drop down menu the admin can select a deal and change the status of the deal to **Open**, **Upcoming** or **Canceled**.

5.1.11 Expired- Deals that does not reach the number of minimum number of purchases set by the company or admin are listed as Expired deals

- Hover the mouse on a deal information to see the options to **Edit**, **Delete**, **list allocated coupons**, **Clone deal**, **View Discussions** about the deal, **View deal**, **quantity sold**.
- Using the More Actions drop down menu the admin can select a deal and change the status of the deal to **Refunded**.

5.1.12 All – This page shows up all the deals together.

- Hover the mouse on a deal information to see the options to edit, delete, **list allocated coupons**, **Clone deal**, **View Discussions** about the deal, **View deal**, **quantity sold**.

5.2 Add a deal

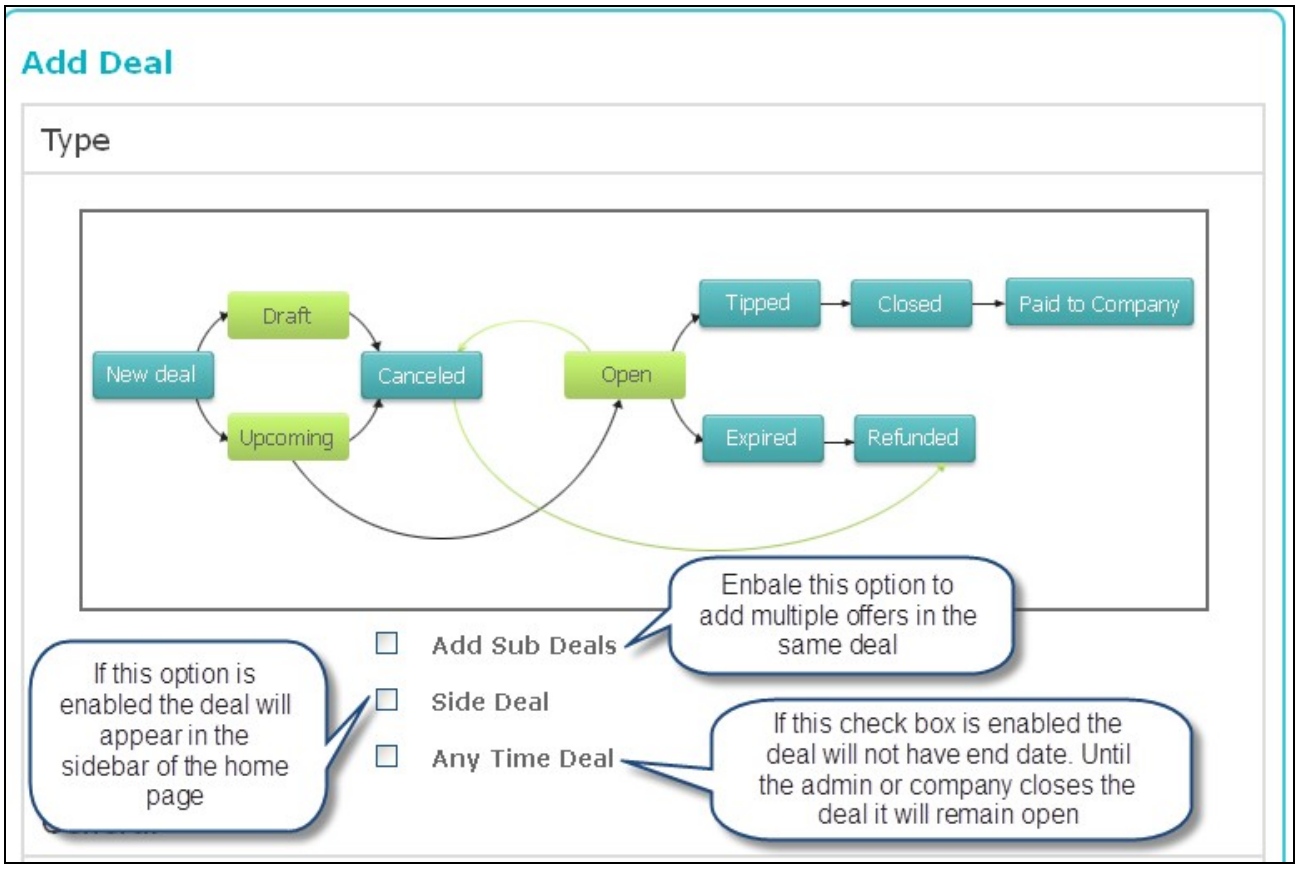
Click Add a deal in the deals menu to get redirected to the add deal page. There are three check boxes before giving general information about the deal

5.2.1 Type of the deal

Enable the check box '**Add Sub deals**' if you would like to give multiple offers in a deal. The user can purchase any one of the offers.

Enable the check box '**Side Deal**' in order to show up the deal in the right hand side of the deals page.

Enable the check box '**Any Time deal**' so that there is no need to fill out the end date for the deal and coupon. The deal will remain in tipped status until the admin or company close the deal.



Add Deal
Type
Draft
New deal

Refunded
Enbale this option to add multiple offers in the same deal
Add Sub Deals
Side Deal
Any Time Deal
If this option is enabled the deal will appear in the sidebar of the home page
If this check box is enabled the deal will not have end date. Until the admin or company closes the deal it will remain open

Figure 5.2.1 Type of the deal

5.2.2 General

Enter the name of the deal in the given text box **Name**

Choose the **Company** to which the deal belongs to

Choose the **start date**, time and **End date**, time **for the deal**. Once the given start date is reached the deal will move to open status from upcoming status and when it reaches the end

date the deal will be moved to closed status(if the deal is tipped) or it will be moved to expired (if the deal didn't get tipped)

Choose the **start date**, time and **End date**, time for the **coupons**. Once the given the start date and time reached and the deal is tipped the users can redeem the coupon at the given locations until the end date.

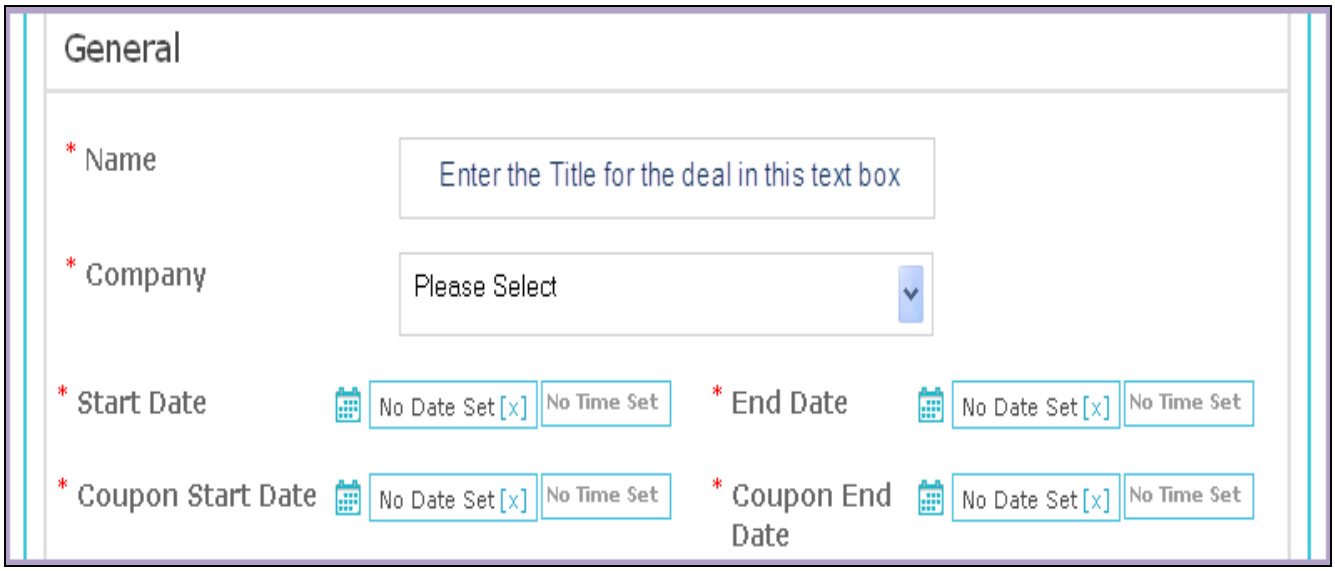

Figure -5.2.2 General

5.2.3 Price

Admin would have to enter the price details of the deal. It is enough to enter the original price and discount percentage other text boxes will get filled up automatically.

- Enter the Original price of the deal
- Discount Percentage
- Discount Amount
- Savings for user
- Discounted Price for user

Discount Budget Amount Calculator

This calculator helps to calculate number of maximum coupons that admin can set for the deal.

Discount Budget Amount – Total Amount the company is willing to give as discount for that deal

Original Price – Price of the deal without discount

Discount Price – Reduced amount from the Original price

Consider a restaurant is ready to give 5000 dollars as discount for the deal, Original price of the buffet is 1000 dollars and the restaurant

is ready to offer it for 500 dollars. Then the calculator will calculate and show up number of maximum coupons as 10.

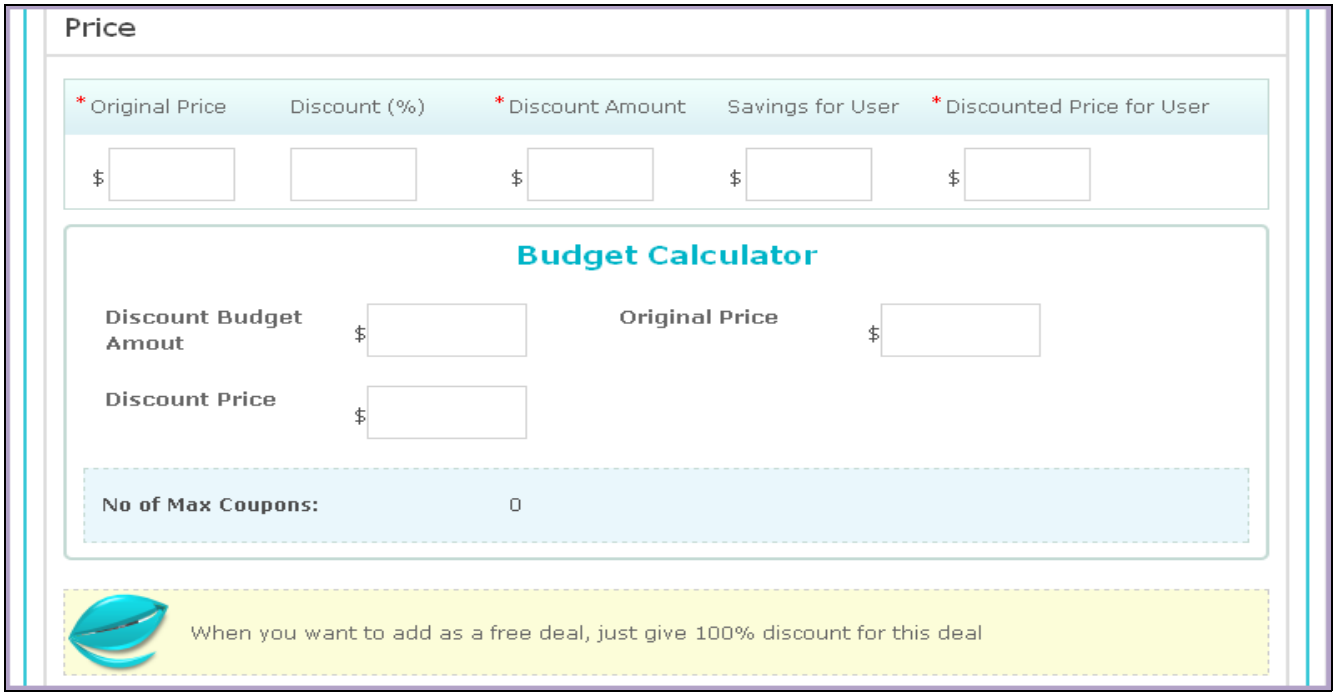

Figure – 5.2.3 Price

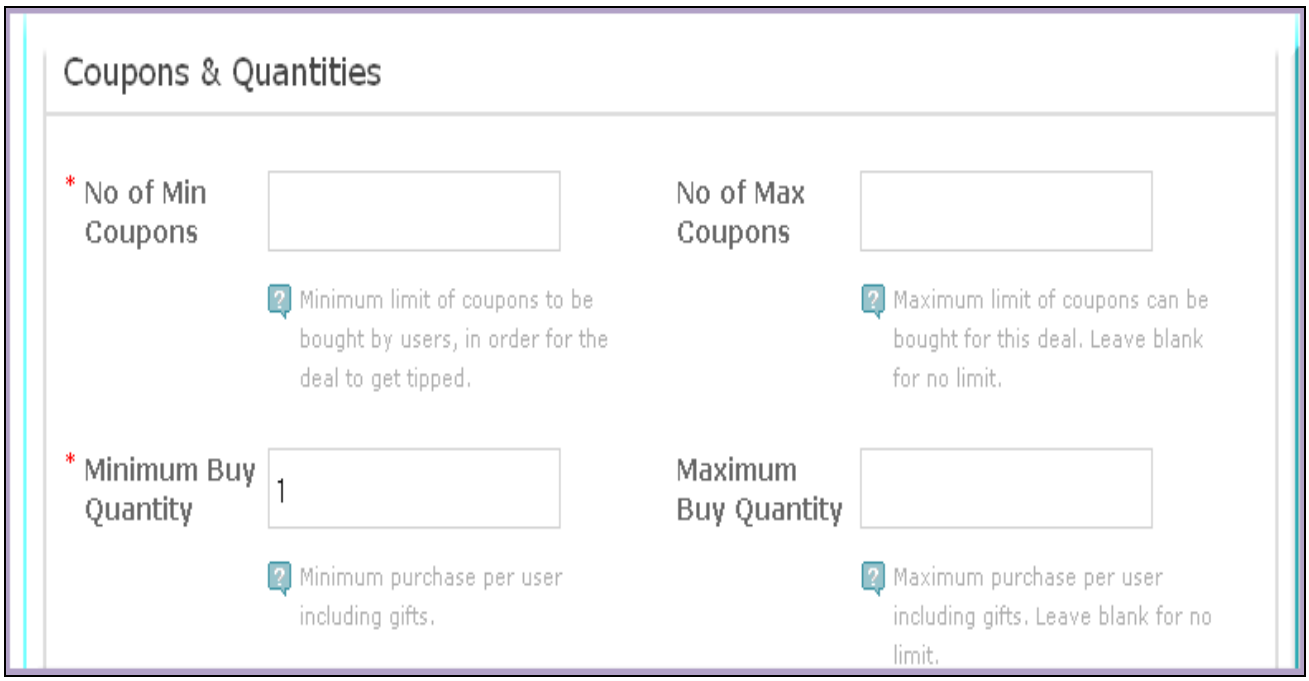
5.2.4 Coupons and Quantities

Minimum number of coupons – Number of coupons should be purchased to change the status of the deal to tipped.

Maximum number of coupons -Number of coupons users can buy for the deal

Minimum Buy quantity – Minimum number of coupons that a user should buy. Consider if this is set as 2 a user who purchases the deal should buy 2 coupons and the user will not be able to buy 1 coupon

Maximum Buy quantity – Maximum number of coupons that a user can buy. Consider if this is set as 5 though the user have 10 coupons available he will be able to buy 5 coupons.



Coupons & Quantities
* No of Min Coupons
No of Max Coupons
Minimum limit of coupons to be bought by users, in order for the deal to get tipped.
Maximum limit of coupons can be bought for this deal. Leave blank for no limit.
* Minimum Buy Quantity
1
Maximum Buy Quantity
Minimum purchase per user including gifts.
Maximum purchase per user including gifts. Leave blank for no limit.

Figure – 5.2.4 Coupons and Quantities

5.2.5 Commission

Bonus Amount – A flat fee the company pay for the deal to the admin(Site Owner)

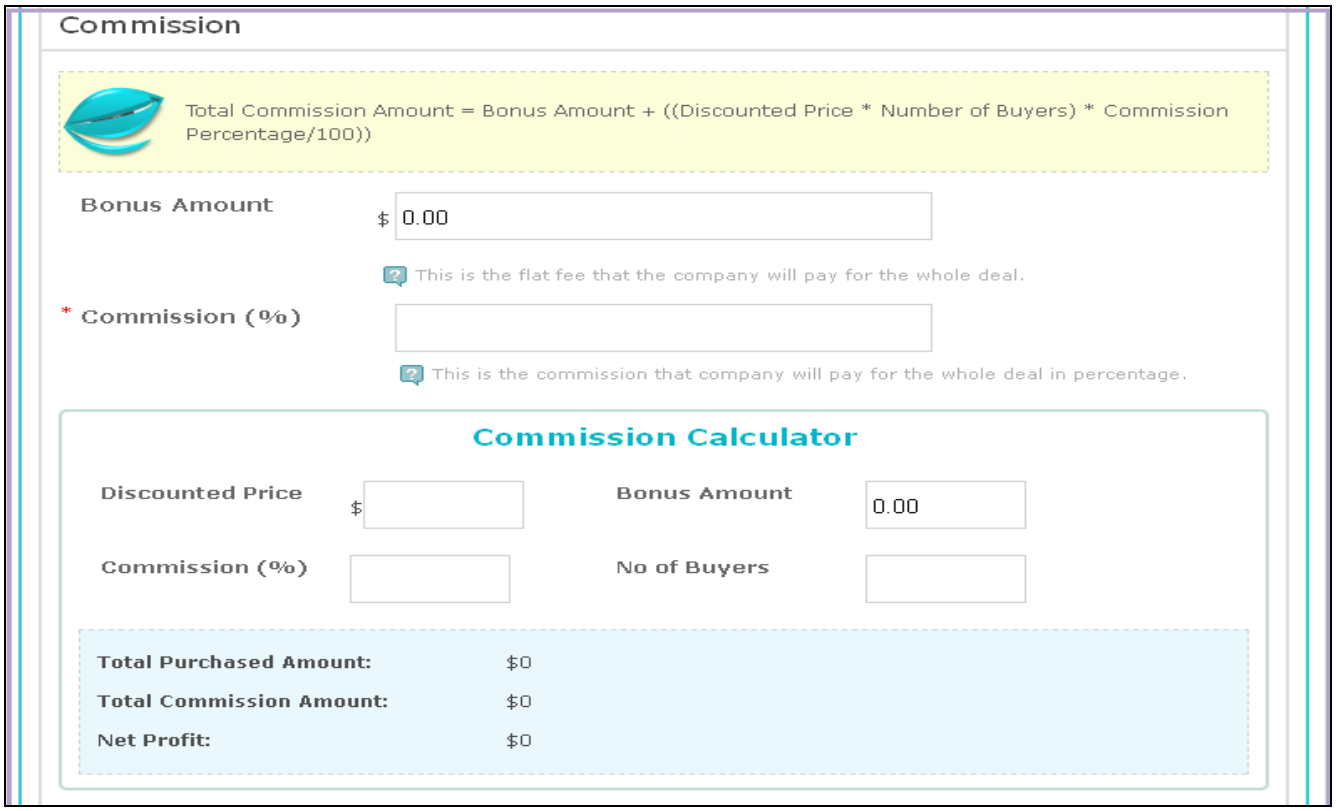
Commission Percentage – The percentage of commission the company will pay for the whole deal

Commission Calculator

Here you can calculate the amount that admin will get for that deal. The formula to calculate the total commission is

Total Commission Amount = Bonus Amount + ((Discounted Price x Number of Buyers) x Commission Percentage/100))

Enter the **discounted price**, **Bonus amount**, **commission percentage**, **number of buyers** to calculate the total commission.



Commission
Total Commission Amount = Bonus Amount + ((Discounted Price * Number of Buyers) * Commission Percentage/100))
Bonus Amount
$ 0.00
This is the flat fee that the company will pay for the whole deal.
* Commission (%)
This is the commission that company will pay for the whole deal in percentage.
Commission Calculator

Commission (%)
No of Buyers
Total Purchased Amount: $0
Total Commission Amount: $0
Net Profit: $0

Figure -5.2.5 Commission

5.2.6 Deal cities

The list of cities added are displayed and you can select the city to which the deal should get posted by enabling the check box near each city. Deal can be posted for more than one city.

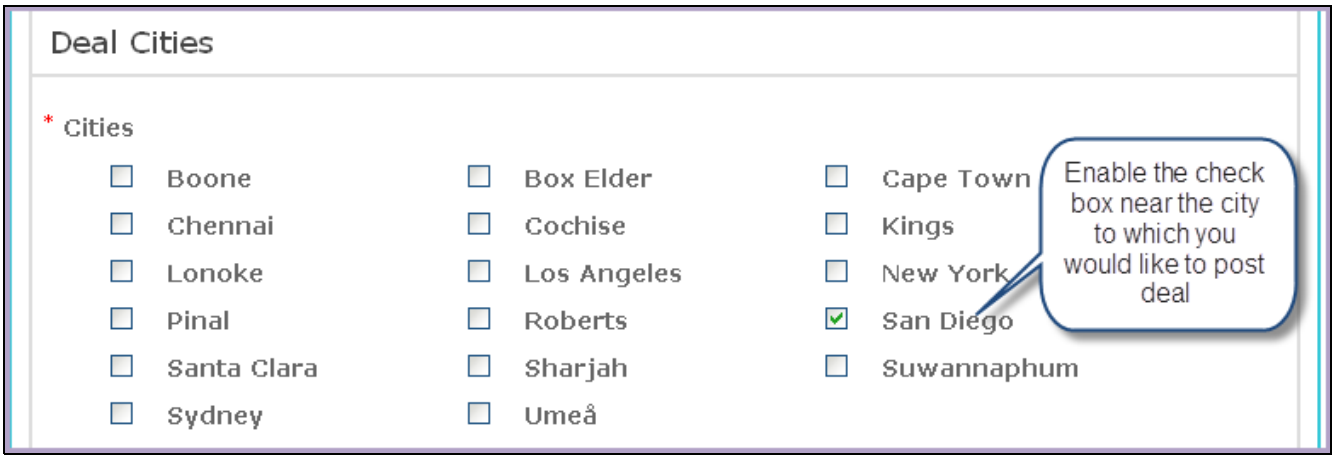

Figure – 5.2.6 Deal Cities

5.2.7 Description

Private note – The admin can write some information about the deal for his reference

Description – The description about the deal that will be displayed in the deal page should be given here.

5.2.8 Deal listing locations

The admin would have to enable the option where the customers can redeem the coupon for the deal they have purchased. If '**Can redeem at your company main address**' is enabled the users will be able to redeem the coupon at the Main branch alone. If '**Can redeem at sub locations**' is enabled then the users can redeem the coupon even at the branches of the company.

5.2.9 Deal Images

Option to add images for the deal. The admin can add maximum of five images for a deal. Click browse, choose the image from the hard drive and add the image.

5.2.10Charity

The admin can decide whether he is willing to give amount to the charity or not. The amount will be deducted from the commission amount.

- Choose the charity from the drop down menu to which the admin would like to give amount
- Enter the commission percentage that admin would like to give to the charity

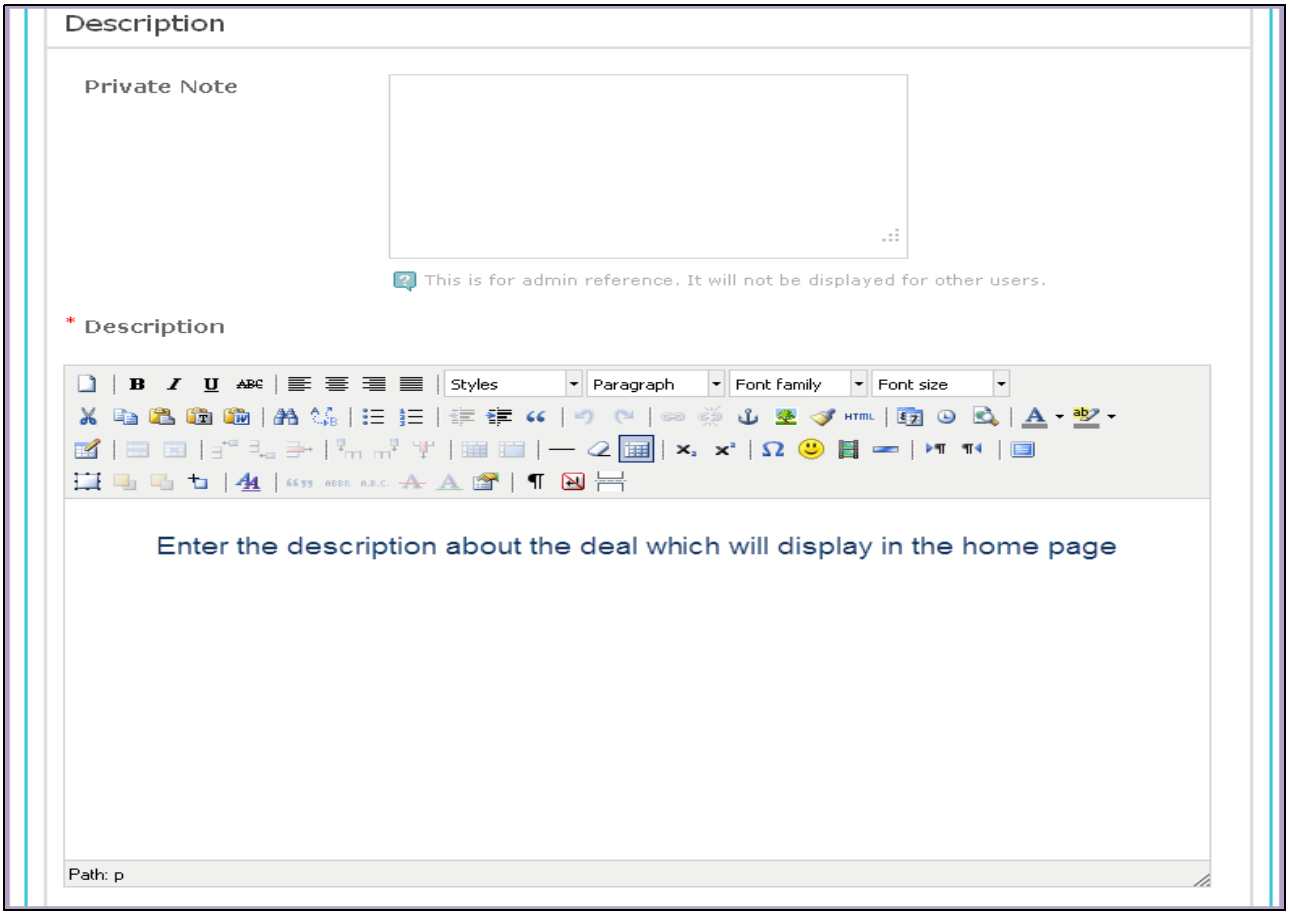

Figure – 5.2.7 Deal Description

Figure – 5.2.8 Deal Listing Locations

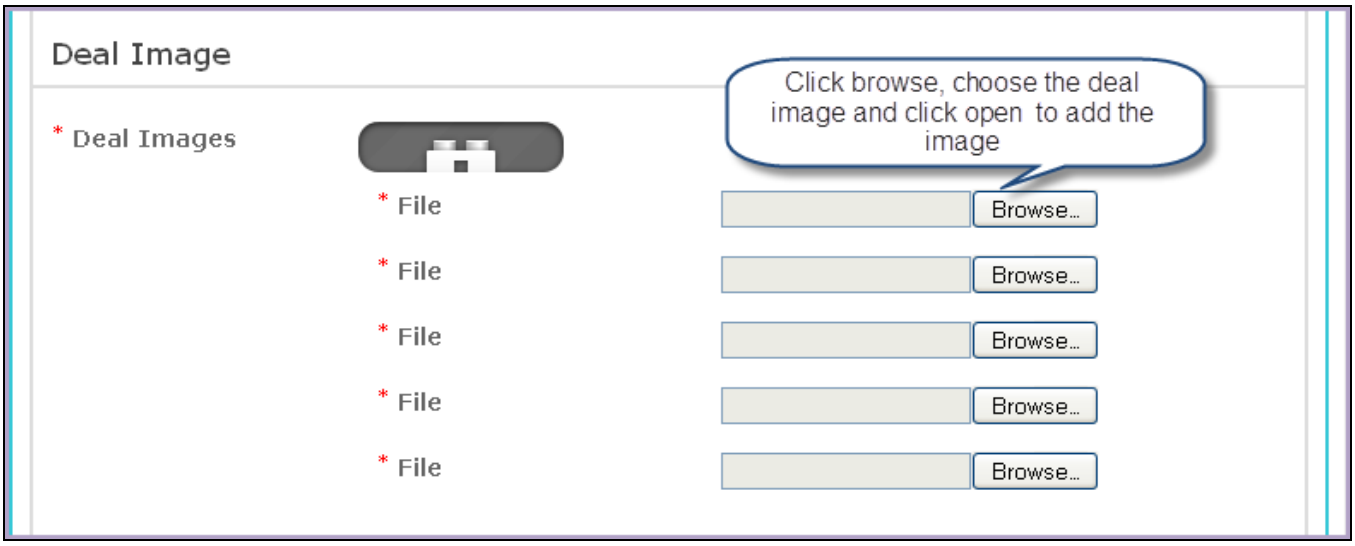

Figure 5.2.9 Deal Images

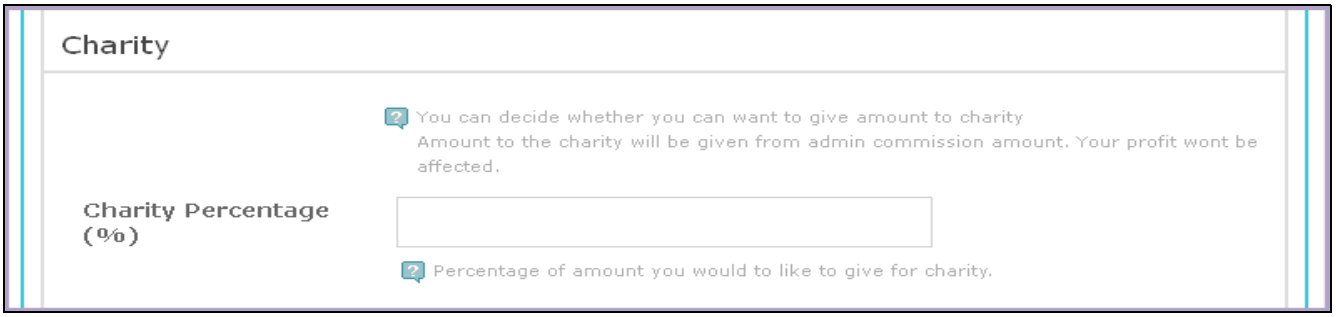
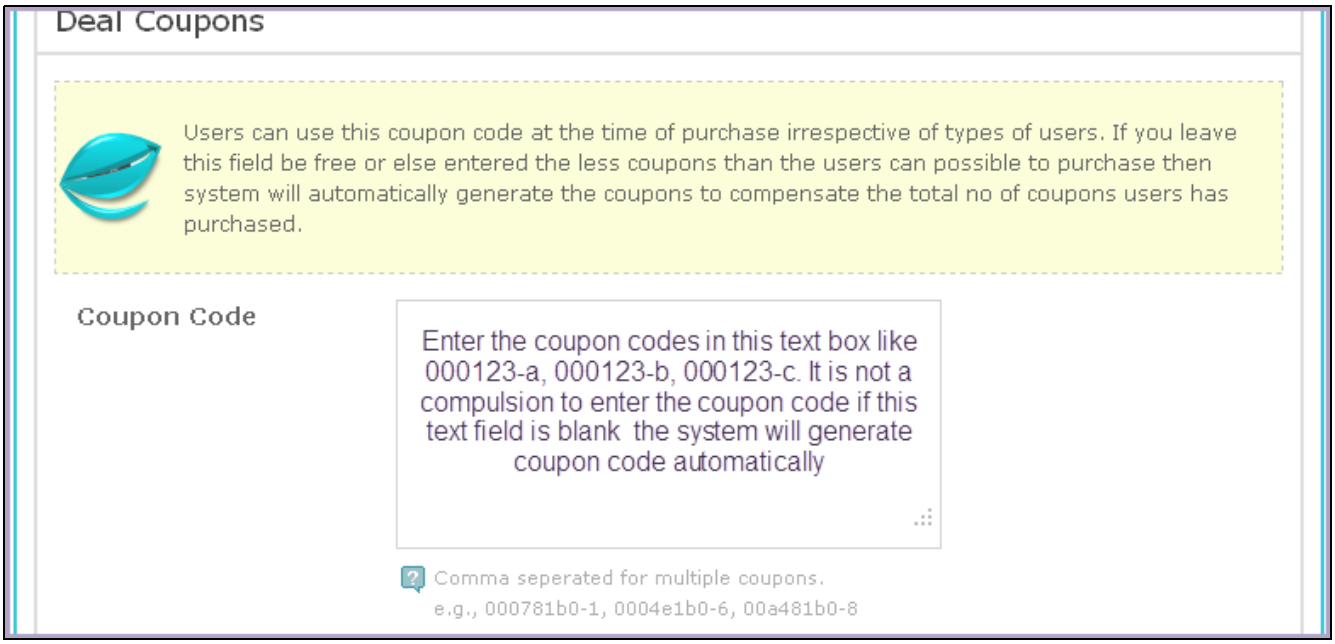


Charity
You can decide whether you can want to give amount to charity
Amount to the charity will be given from admin commission amount. Your profit wont be affected.
Charity Percentage (%)
Percentage of amount you would to like to give for charity.

Figure – 5.2.10 Charity

5.2.11 Deal coupons

The admin can enter the coupon codes which acts as an identification and helps the users to redeem the coupon. If the admin failed to enter the coupon code or the given number of coupon codes is not equal to the number of maximum coupons set then the system will automatically generate coupon code.



Deal Coupons
Users can use this coupon code at the time of purchase irrespective of types of users. If you leave this field be free or else entered the less coupons than the users can possible to purchase then system will automatically generate the coupons to compensate the total no of coupons users has purchased.
Coupon Code
Enter the coupon codes in this text box like 000123-a, 000123-b, 000123-c. It is not a compulsion to enter the coupon code if this text field is blank the system will generate coupon code automatically
Comma seperated for multiple coupons.
e.g., 000781b0-1, 0004e1b0-6, 00a481b0-8

Figure -5.2.11 Deal Coupons

5.2.12 Enter the **review** about the company

5.2.13 Enter the **conditions** if any to use the coupon

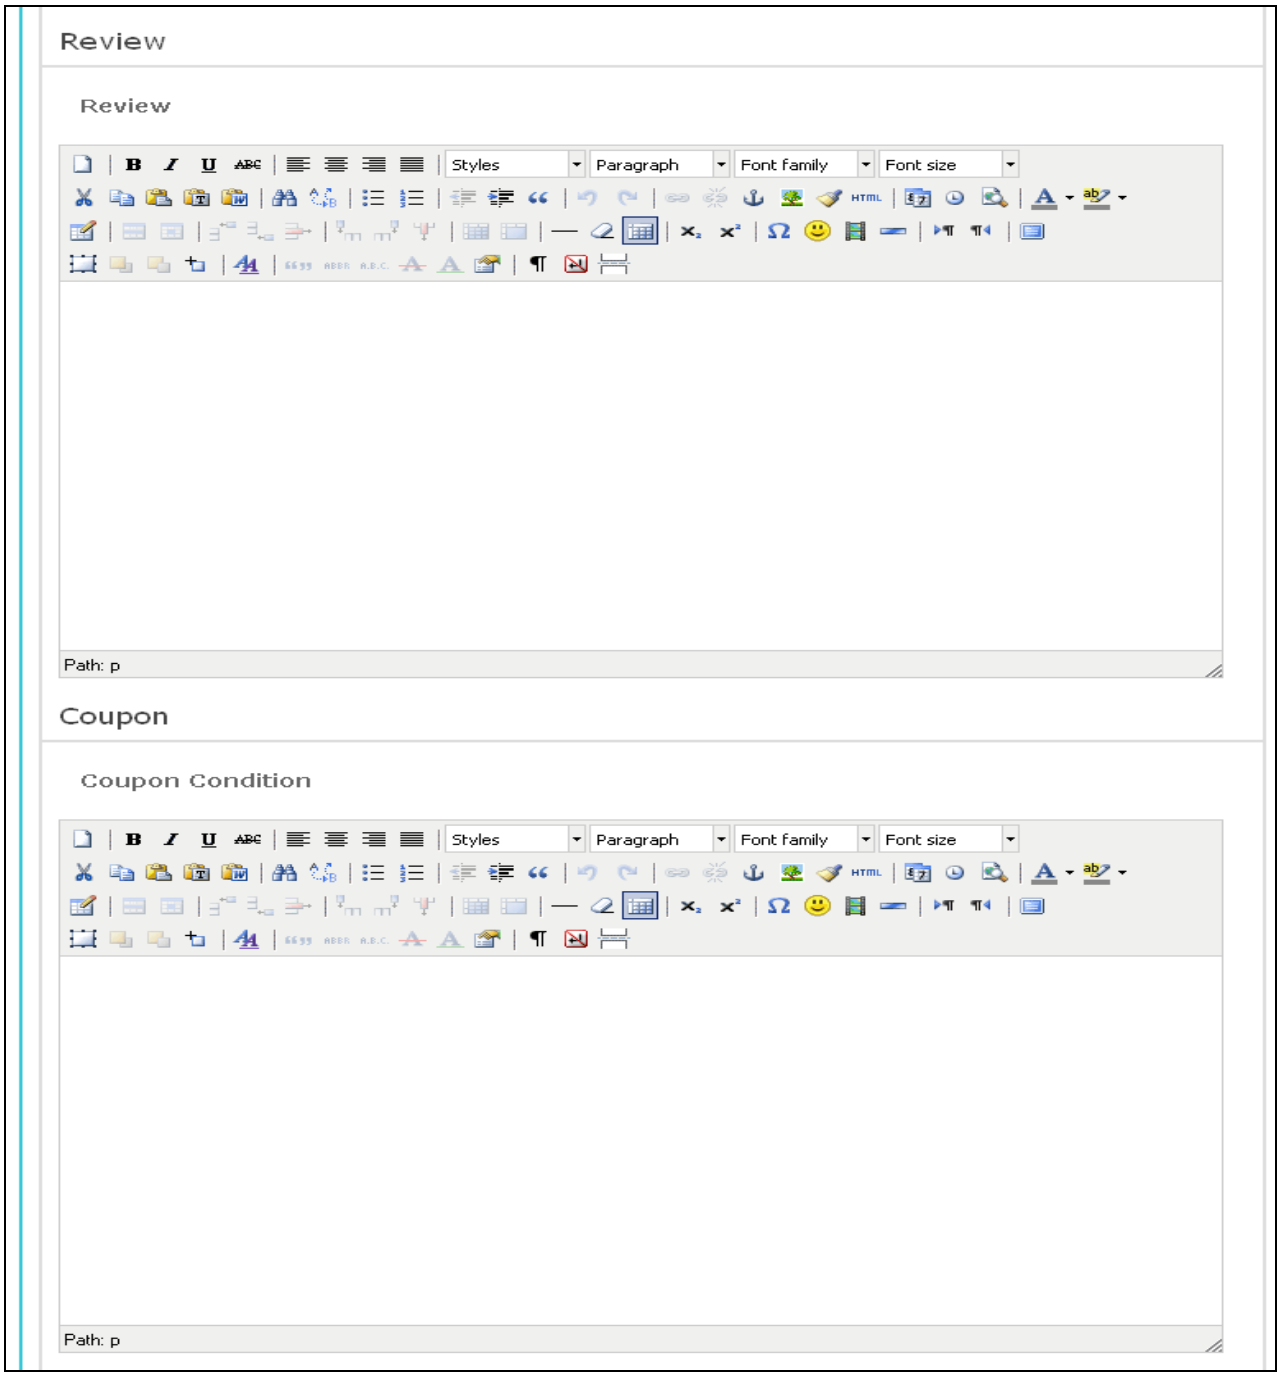
5.2.14 Enter the **coupon highlights**

5.2.15 Enter the **comment** about the deal

5.2.16 Enter the **meta keywords** and **description** to get more visitors for the deal through search engines.

5.2.17 Click **Add** to create the deal. The deal will be displayed in upcoming deals page

5.2.18 Click **Save as Draft** to save the deal as draft. The deal will be displayed in draft deals page. We can save the deal as draft to preview and edit the deal. Do the needed changes and click update to move the deal to upcoming deals page, update as a draft to save the changes done and to make the deal remain in the draft deals page.



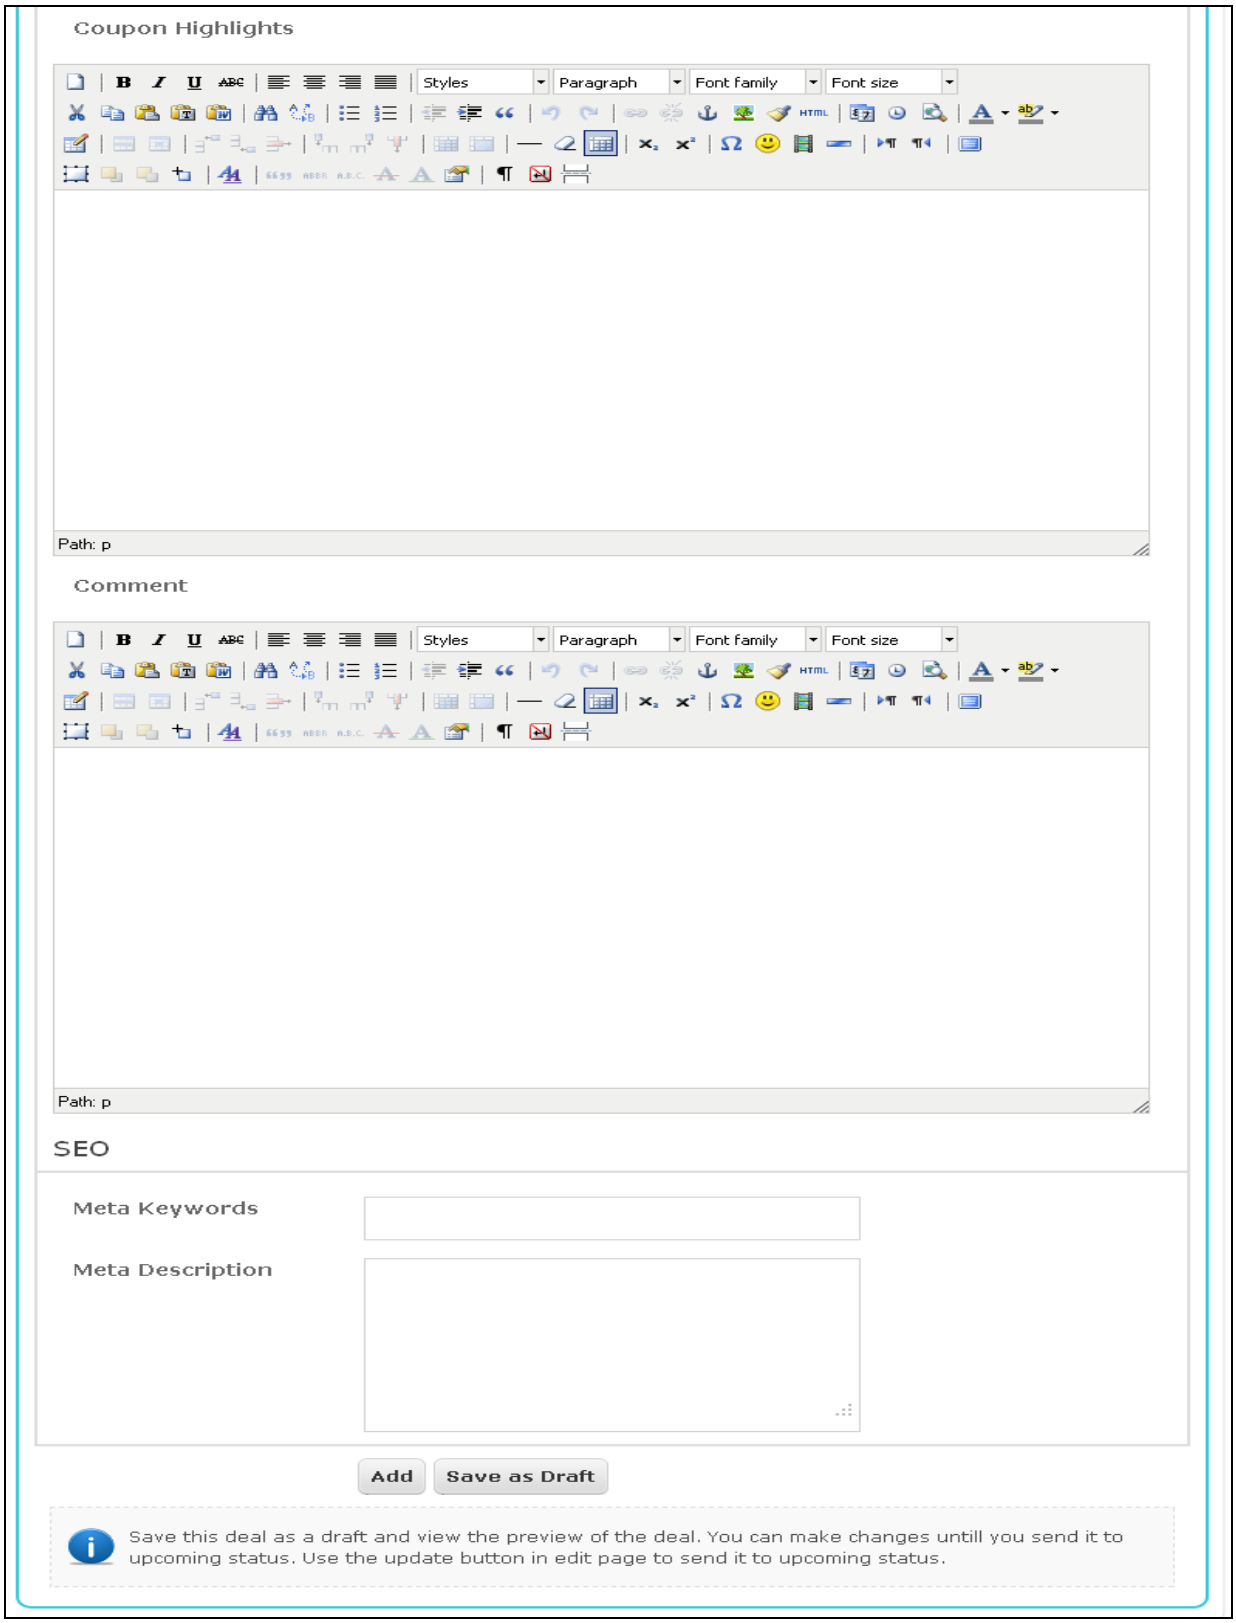


Figure-5.2.12 Review to Add deal button

8Subscriptions

The users can subscribe to the website by entering the email address and choosing the desired city. Once subscribed the users will receive email which contains the deal information for the city they have subscribed.

8.1Subscriptions

Click subscriptions to see the list of users who have subscribed to the website. By default the list of subscribed users are displayed.

8.1.1Subscribed Users

This page shows up the list of subscribed users and the options to do with the subscribed users.

- Common information displayed in this page are
    1. Date the user subscribed on
    2. Email of the user
    3. City to which they have subscribed
- Hover the mouse over the user information you will see the option to delete
- Option to search the subscribed user by entering key word and clicking search
- Export the list of users in an excel sheet by clicking CSV option
- Below the list of subscribed users there is 'More Actions' drop down menu to delete or unsubscribe more than a user at a time.

Figure – 10.1 Topics

10.1.1All

This page displays all the topics posted on the website for discussion. The information shown in this page are

- Type of the discussion topic(Deal talk, city talk & Global talk)
- If the discussion is about a deal then it shows the deal name in the deal column,if it is about the city then it shows the city name in the city column leaving the deal column blank. For Global Talk both deal and city column are left blank
- The topic of the discussion and the content for discussion,
- Date the topic is posted on
- Topic Discussion count shows number of responses received for that topic
- Date on which the last reply is posted

Hover the mouse over the topic to see the option to edit and delete the topic

Below the list of topics there is More actions drop down menu to select and delete more than one topic at a time.

10.1.2Deal Talk

This page shows the topic posted about the deals in different cities. By default the type is **Deal Talk**. All other information displayed and the options available are **same as** the **All** Topics page.

10.1.3City Talk

Topics posted to discuss about different cities are categorized and shown in this page. By default the type is **City Talk** and the deal name column left blank. All other information displayed and the options available are **same as** the **All**

10.1.4Global Talk

Topics discussed about the website are categorized and displayed in this page. By default the type is Global Talk and the deal, city columns are left blank as it is not about a deal or city. All other information displayed and the options available are **same as** the **All.**

10.2Topic Discussions

This page shows up the details about the discussions on the topic posted. Common information displayed in this page are

- Name (Topic) – Title of the deal
- User who have participated in the discussion and shared his comments
- Comments given by the user
- Ip of the user who have posted the comment
- Date on which the comment is posted.

Hover the mouse over the discussion details and see the option to **Edit**, **Delete** and **Ban the User ip**.

Below the discussion page there is **More Actions** drop down menu to delete the discussion more than one at a time.

Figure – 10.2 Topic Discussion

11 Payment

The users can purchase the deal and pay online for their purchase. To make their payment online number of payment gateways are integrated with our website and the transactions history are stored in the website for admin reference.

11.1 Payment Gateways

Click Payment Gateways to view the list of payment gateways integrated with the website. Payment Gateways Integrated are **Pagseguro**, **Authorize.net** and **Paypal**.

Information shown in this page are

1. Display name given for the Payment Gateway
2. Description about the payment gateway

3. Status of the payment gateway whether it is Test mode or not

Hover the mouse on the payment gateway and see the option to edit the details about the payment gateway. Two modes of payment gateways are Test mode and Live mode. Test mode as the name implies it is given to test how payment works in the site before going live. The test mode should be turned off when site goes live.

11.1.1 Edit Payment Gateway

Common options for all the payment gateways in the Edit Page are

1. To add the **display name** of the payment Gateway
2. **Description** about the payment Gateway
3. Enable the check box if the payment gateway is **Active** for making payment
4. Enable the check box to enable **Test Mode.** If the option is **Enabled** the status in

the Payment gateway page will show up as **Yes**

5. Enable the check box which will give users the option to **Add amount to wallet** using the payment gateway.

If the option is not enabled if a user try to add amount to wallet the payment gateway will not listed in the page.

6. Enable the check box so that users can **purchase deal**

Same as the Add amount to wallet page if the option is not enabled and the user click Buy and redirected to buy page in the payment type the payment Gateway is not listed.

7. Enable the check box so that users can **buy gift card**

Same as the Add amount to wallet page if the option is not enabled and the user click Buy a Gift Card and redirected to buy page in the payment type the payment Gateway is not listed.

Regarding **Receiving payment** the **information** needed differs from each payment gateway

Pagseguro payment gateway

The **Pagseguro** Gateway just asks for **Payee email** (Email of the account holder who will receive money) for both live mode and test mode.

Authorize.net Gateway(via Credit Card)

The information to be filled out to receive payment done using Credit card is **Authorize.net Api key** and **Authorize.net Trans key.**

Note: *Display name, description, Enable and disable options are same for all Edit Payment Gateway pages. The account details need to be filled up for sending and receiving payments differ for each payment gateway. So the screen shots of the Account details(Live mode and test mode) alone taken and added for other payment gateways.*

Figure – 11.1.1 Edit page for Pagseguro Payment Gateway

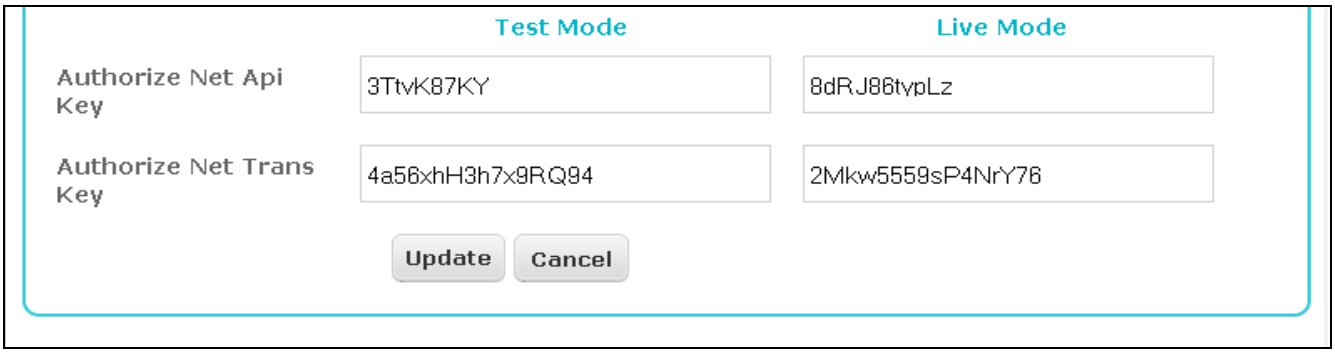
Paypal

Paypal needs **Merchant account email**, **Receiver emails** (you can also add more than one receiver email) and **Mass pay API user name**, **Password**, **Signature** for both test mode and live mode. Mass pay API is created to send money to the users.

Credit Card using Paypal

Admin would have to enter **Direct Pay API User name, Password, Signature** to allow users

to make direct payment using their credit card for both live mode and test mode.



(Account details field)

13.2Commission History

The commission history table displays the information about the commission for the affiliate user, for deal purchase or Sign Up, the status and the commission amount. The commission history is categorized based on the status of the process.

13.2.1All

Although the commission history is categorized based on the status this page shows all the history in different status. Common information shown in this page are

- **Date** on which the history is created
- Affiliate **User name**
- **User/Deal** – If the user purchases a deal name of the deal is displayed in this column
- **Type** – Sign up or Purchase

If the user joins the website through the affiliate the type is **Sign Up**

If the user purchases a deal the type is **Purchase**

- **Status –** Pending/Completed/Pipeline
- **Commission Amount** for the affiliate user

Pending – If a user referred by the affiliate user purchases a deal and the deal is yet to be tipped, then the purchase will show up in Pending status

Canceled – If a user referred by the affiliate user purchases a deal and the deal is canceled by the admin or company user then the commission amount for the affiliate user will be canceled and listed under Canceled affiliate commission

Pipeline – If a user referred by the affiliate user joins the website (Sign Up/register) or

Purchases a deal(Deal is tipped) the commission amount for the affiliate user is blocked and will show up in Pipeline status until the **Commission Holding Period** . Consider the Commission holding period is set as 7 days the commission amount will be blocked and show up in pipeline status for 7 days.

Completed - Once the commission holding period ends the commission amount in Pipeline status will be changed to Completed and the amount will be available for the affiliate user to withdraw. Consider the Commission holding period is set as 7 days the commission amount will be blocked and show up in pipeline status for 7 days, after 7 days the status will be changed to completed.

14.3User

In this page the admin can do changes in user related settings. All enable/disable options for user related settings are listed here.

Admin Activation after Registration – If the check box is enable after every user completes the registration process the admin would have to activate the user's registration.

Email Verification for Register – If the option is enabled the user will receive an email with an activation link to complete the registration process.

Auto Login after Register – If this option is not enabled the user will be taken to the my account page once he completes the registration. To enable this option Email Verification for Register should not be enabled.

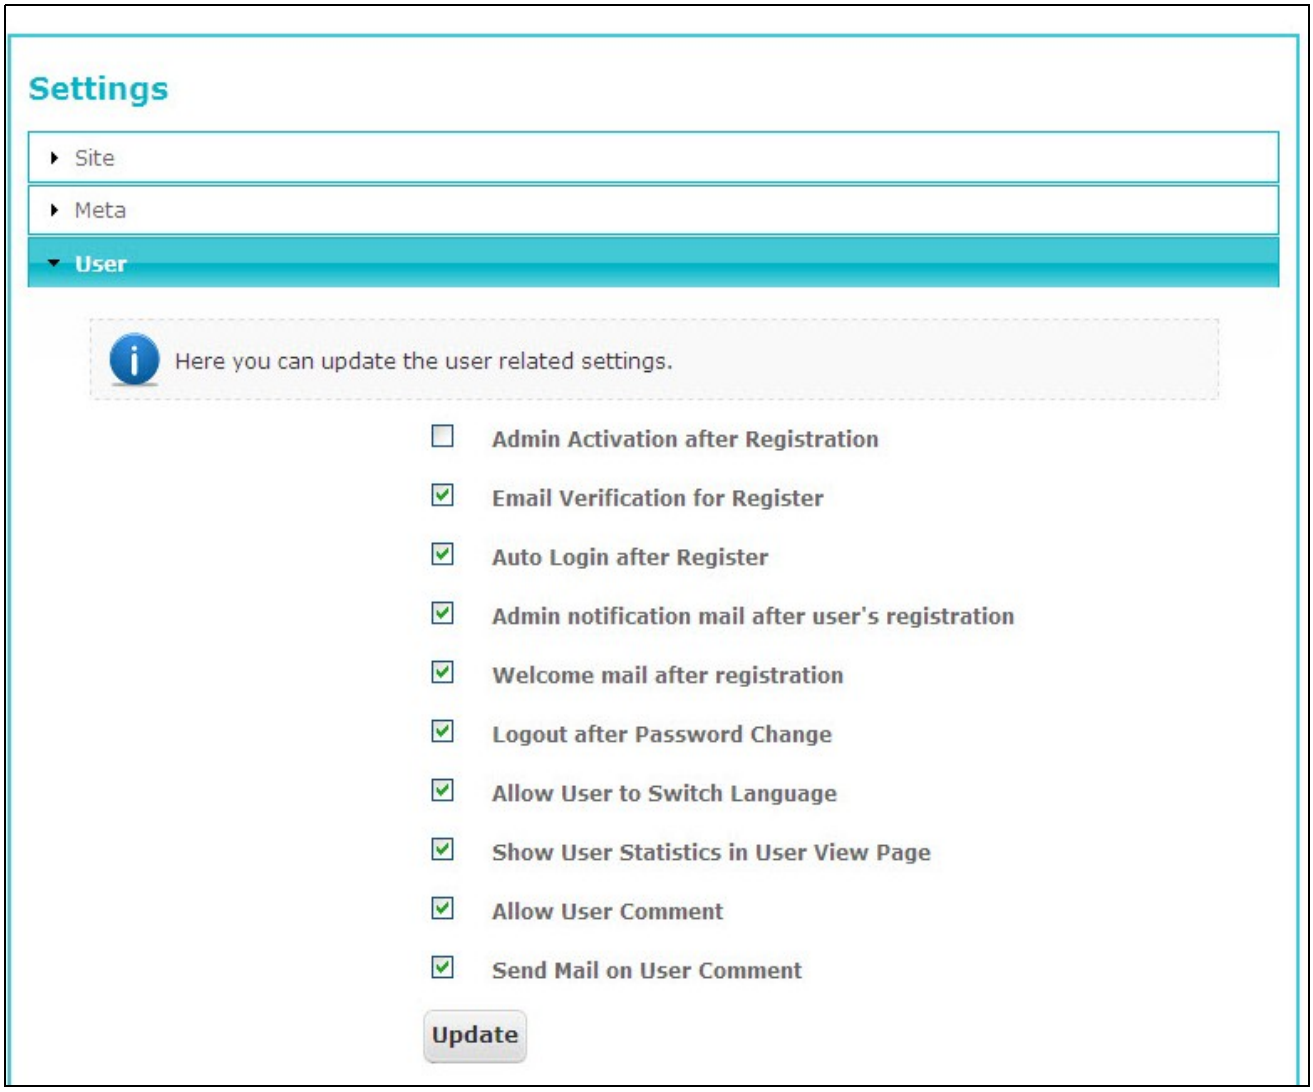

Figure – 14.3 Users

Admin notification mail after user's registration – If this check box is enabled the admin will receive a notification email after a user completes the registration process.

Welcome mail after registration – If this check box is enabled the user will receive a welcome email from the website after registration.

Log out after Password Change – If this option is enabled the user will be automatically logged out of the site after he changes the password.

Allow User to Switch Language – The user will have a drop down option to switch to the

desired language if the check box is enabled.

Show User Statistics in User View Page -

Allow User Comment – If this option is enabled the user can post comments

Send Mail on User Comment – The user1 will receive a notification email saying that this user2 is given a comment for you.

14.4Logins

Here the admin can do the changes in the User log in options.

Choose any one option from the **drop down** menu **Email/User name**. If Email is chosen in the log in page the user would have to enter the Email and Password and if User is chosen the user would have to enter the User name and Password in the log in page.

Enable Facebook Login – If this check box is enabled the users can log in using their Facebook id.

Enable Twitter Login – If this option is enabled the users can use their Twitter log in details to log in

Enable Open Id – Enable this option so that users can log in using their Open ID

Enable Yahoo – Enabling this option will give users the ability to join the website using their Yahoo id.

Enable G mail – If this check box is enabled the users can join the website using their G mail account.

Enable Foursquare – Users can log in using their foursquare account if this option is enabled.

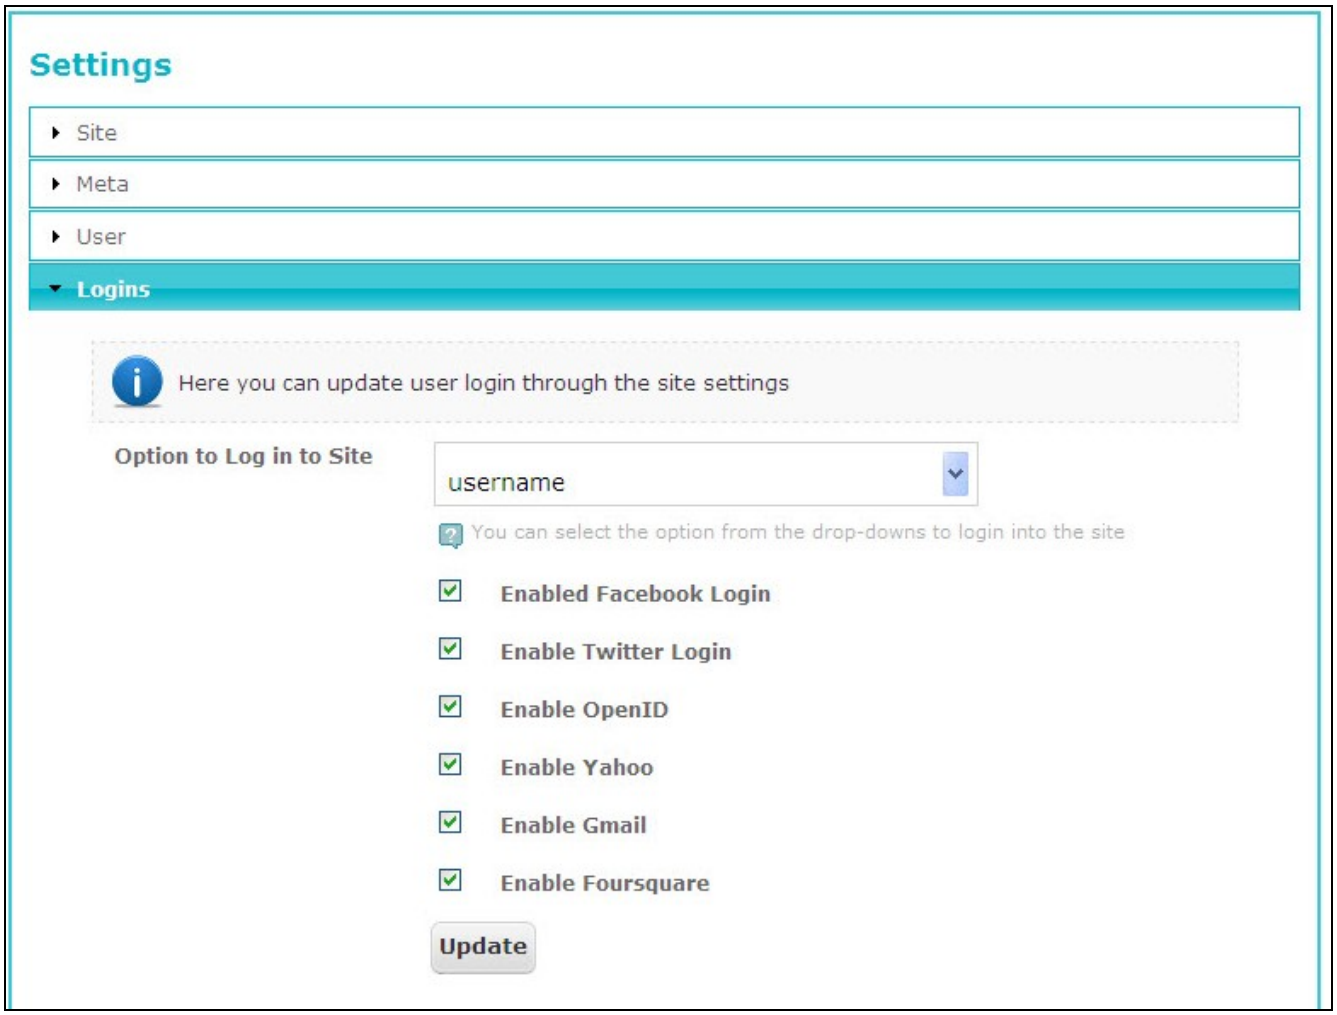

Figure – 14.4 Logins

14.5Facebook

The admin would have to create an application and enter the **Application information** in the website to get deals posted in the wall. Details that need to be filled out in the page

- Face book Application ID
- Face book Page ID
- Face book Application API Key
- Face book Application Secret Key

Face book Application ID and Facebook **Application API Key are same**. After filling up this information click **Update Facebook credentials** and follow the steps,Facebook **Access Token** and Facebook **User Id** will get updated automatically.

Other information to be filled up regarding Facebook are **Site Facebook URL**(URL of the page where the deals should get posted), Enable/Disable option to **post deals on Facebook wall**, information that need to be posted in the Facebook Wall like **deal name, deal image, deal link**,Facebook **like box** code to integrate Facebook like option in deals page,Facebook **feeds code** to show up in the home page.

14.6Barcode

The admin can **Enable/Disable** the bar code option in deal coupon. The admin can choose the bar code from the drop down. If the bar code option is enabled the admin would have to enter the **width and height of the bar code** and the bar code will show up in the specified size in the deal coupon.

Handle wallet like in Groupon
Update

Figure – 14.7 Wallet

14.7Wallet

The admin would have to just enter the **Minimum amount and maximum amount** the user can **add to the wallet**. **Enable/Disable option** to handle wallet like **groupon**.

14.8Deals

Invite After Deal Add – If this option is enabled after a user completes purchasing a deal he/she will be redirected to invite friends page. The user can share the link of the deal and invite them to purchase using the options in the Invite friends page. The choices in the page are

- Social medias like Facebook, twitter
- Send the deal link in email to the friends

Enable Auto Refund of Deal Amount – If a deal didn't get tipped then the amount should be refunded to the users who have purchased the deal. If this option is enabled the amount will be refunded to the user automatically.

Auto Pay to Company Once Deal Closed – If a deal reaches its end date then the status of the deal is set to be closed. If this option is enabled the deal amount will be paid to the company automatically.

Show Deal Purchased List in User Profile Page – Consider user1 and user2 are participating in a topic discussion. User1 clicks on the user name of User2 in the discussion page and User1 is redirected to the profile page of User2. Top of the profile page it will show up the information like **Referred Users (6) Friends (1) Deal Purchased (31) Gift Sent (4) Gift Received (1).** If this option is disabled **Deal Purchased (31)** will not show up in the profile page.

Show Deal Purchased List in Company Profile page – Changes after Enabling or disabling this option can be noticed only if the **Enable Company Users to have the Normal User Features** option is enabled in **Settings → Company.**

Let us consider

i) Both options **Show Deal Purchased List in Company Profile page & Enable Company Users to have the Normal User Features are enabled** and a user views the company's profile page. The top of the profile page will show up information like Deal Owned (0) Referred Users (0) Friends (0) **Deal Purchased (0)** Gift Sent (0) Gift Received (0)**.**Below the company address and Google map there are tabs **Comments, Deals Owned, Deal Purchased, Friends and Referred users.** Here the **Deal Purchased tab** is displayed because **Show Deal Purchased List in Company Profile page** is enabled.

ii) Consider **Show Deal Purchased List in Company Profile page is disabled & Enable Company Users to have the Normal User Features is enabled** the **Deal Purchased (0)** will show up at the top of the profile page. Below the company address and Google map there are tabs **Comments, Deals Owned, Deal Purchased, Friends and Referred users.** Here the **Deal Purchased tab** will not be displayed.

iii) Consider **Show Deal Purchased List in Company Profile page is enabled & Enable Company Users to have the Normal User Features is disabled** then the entire page display will be changed. The **Deal Purchased (0)** will not show up at the top of the profile page and the tabs Below the company address and Google map there are tabs **Comments, Deal Purchased, Friends and Referred users** will not not appear and the deals owned tab alone will show up list the deals owned by the company

Show Owned Deals Listing in Company Profile page – If this option is enabled the deals added by the company are listed in the company's view page. Enabling and disabling **Enable Company Users to have the Normal User Features** option in Settings → Company affects the appearance of Owned Deals page.

Let us consider

i) Both options **Show Owned Deals Listing in Company Profile page** and **Enable Company Users to have the Normal User Features** are enabled the deals owned will appear as one of the tabs. By default Comments tab will show up and the next tab is Deals Owned. Click on Deals owned tab to view the list of deals added by the company.

ii) Consider **Show Owned Deals Listing in Company Profile page** option is enabled and **Enable Company Users to have the Normal User Features** is disabled, then by default Deals Owned tab will show up in the page listing all the deals added by the company.

Show Side Deals in Listing Page – If this option is enabled the side deals will show up in the Company's Deals owned list, the side deals will not be listed if this option is disabled

Deal Coupon Used Type - Admin can choose any one of the option from the drop down as click/submit to set how the users can change the status of the coupon as used. This option will be in effect if **Allow User to Change Coupon Status** option is enabled.

Click – If **click** option is chosen the users can view a click-able option **Use now** in **Mygroupdeal page** of their account. Users would have to click Use now to set the coupon as used. If a user clicks Use now the site will ask for **confirmation** saying “You cannot undo changes” , the user have to click **OK** to proceed and **Cancel** to stop the action. The deal will

be changed to **used** category if the user have clicked **OK** and will remain in the **Available** category if the user have clicked **Cancel**.

Submit - If **submit** option is chosen then the users would have to enter the coupon code of the coupon for which the status should be changed into a **text box** given and then have to change the status.

Deal Coupon Code Show Type – The choice changes in the drop down are reflected if the **Deal coupon used type** is set as **Submit.** If admin chooses top from the drop down the users have to enter the top code of the coupon that need to be changed to Used status in the text box. If admin chooses Bottom from the drop down then the user would have to enter the Bottom code of the coupon to change the status of the coupon.

Allow User to Change Coupon Status – If this option is enabled the user can change the status of the coupon (as redeemed)

Enable Sub Deal – If this option is enabled **Add deal** page will show up **Enable option to Add Sub deals** else it will not show up.

Find Near Deal by – Admin have to set whether the site would have to grab deals from near by city or from location and display the deals in the side bar of the index page.

Nearby Deal Distance Finder(in KM) – If Fine Near deal by option is set as Location the site will consider the distance given here in the text box and grab deals available within the specified distance.

Enable payment in advance – If this option is enabled the user can pay an amount and b the deal

Commission Amount Type

Choose either Minimum or fixed as commission amount type from the drop down.

Minimum - If option **Minimum** is chosen admin can set a minimum amount(percentage) as needed commission and the company should give the minimum amount set by admin or more than the mentioned amount as commission.

Fixed – If **fixed** option is chosen admin can set a fixed commission amount(percentage) for all deals. The company should give the amount set by admin as commission.

Commission Amount – Admin can enter the percentage of commission needed from the company for a deal in the given text box.

Index Page Sidebar Main Deal Limit – Set Number of Main deals to display in the side bar of the index page

Index Page Sidebar Side Deal Limit – Set Number of Side deals should display in the side bar of the index page

Index Page Sidebar Nearby Deal Limit – Set Number of Near by deals that can be displayed in the side bar of the index page .

14.9Cash Withdraw

The admin can set the options for users and companies to withdraw amount from the wallet.

14.9.1Users

User Can Withdraw Wallet Amount - Enable this check box to allow users withdraw amount from wallet.

Enter the **Minimum** and **Maximum amount** that user can withdraw in the text field given.

If the check box **Pay to User Automatically Once Request Received** is enabled, without admins approval the withdraw fund request will be processed.

14.14Twitter

The admin would have to create an application and enter the **Application information** in the website to get the deals shared in the twitter. Information that should be filled up in the page are **Consumer Key** and **Consumer secret**. **Click Update credentials** and the Twitter will ask to log in and we would have to log in using the account details in which the deals should be posted and proceed. **Access Key** and **Access Token** will get **updated automatically**.

Other twitter information that need to be filled up in this page are Twitter User name, Site

Twitter URL, Deal message post(what are the information need to be posted in Twitter Site name as slug, Deal URL and Deal name.

Prompt for email after registration – Enabling this option will ask the users to enter their email immediately after completing registration process.

Post New Deal on Twitter – Enabling this option will allow the deals get posted in the twitter.

Twitter Feeds – Enable this option to display twitter feeds in the home page.

Twitter Widget Code – Enter the code in the text box given using which the twitter feeds will show up in the home page.

Enter the needed information and click update to save the changes.

14.15Google Map

In this page the admin can fill out the **Google map zoom level** and choose the **map type** he would like to use. The default zooming level is 9(1-15) the company user can adjust the zooming level in their profile.

Map Type – Admin can choose the map type from the drop down menu. It can be static or embed type.

Difference between the static and embed map type

The static map simply displays the location of the company and the site visitor cannot drag the map or zoom in and out. If the user clicks the map they are taken to Google Maps where they have all the regular functionality.

In the embedded map the user can stay on your site and perform all the regular Google Map functions.

19.2Add New Text

Click Add new text and get directed to translate a new text to the already translated language. Consider you have translated your site to French language and now you would have to translate a new piece of text then you can do it in the Add new text page.

- Enter the key text
- Enter the equivalent translated text in the corresponding language text box
- Click Update to add a new translated text

20Languages

This page lists the languages added to the website. By default the page displays the Active records. The languages are categorized based on their status Active or Inactive.

Active Records – This page displays only the active languages

Inactive Records – This page displays the list of deactivated languages

Total Records – This page displays both active and inactive records together

Information shown in this page are

- Language
- ISO2 code – Two letter code for the language
- ISO3 code – Three letter code for the language
- Hover the mouse on any language and see the option to edit the language information.
- More actions drop down menu to change the status of more than one language to Active or Inactive and delete languages

The admin can add a language by clicking the Add button and redirected to Add Language page

- Enter the language
- ISO2 code
- ISO3 code
- Click Add to add a new language

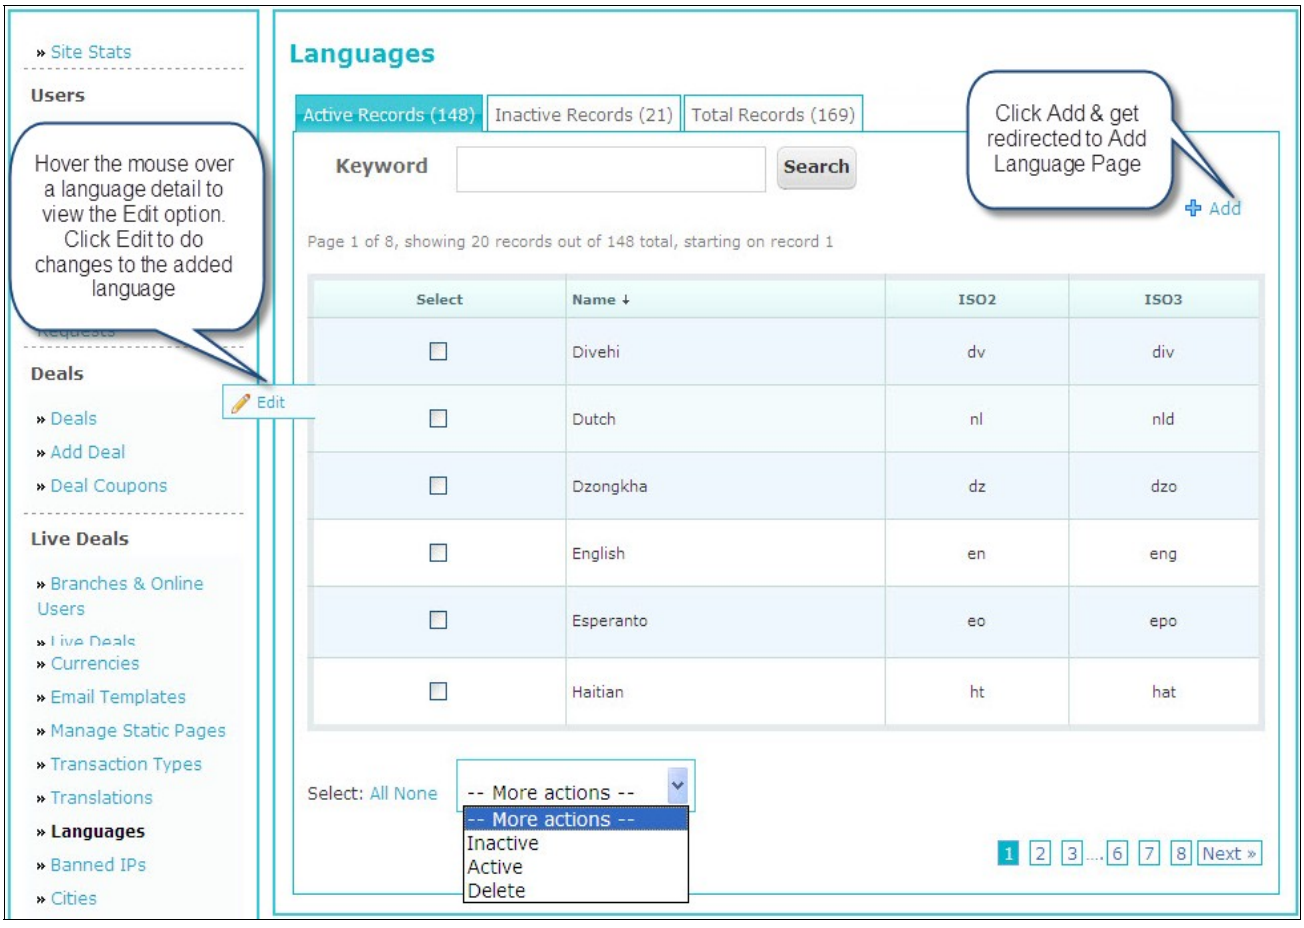

Figure -20 Languages

21Banned Ips

This page shows the list of banned ip

- **Victims** – Banned ip user
- **Reason** – The admin would have to give reason why the ip is banned
- **Redirect to** – Where the user will be redirected to if he tries to login
- **Date** - Date when the ip is banned
- **Expiry date** – When the ip ban expires and after the expiry date the user can again visit the website

Add Ban

The admin can also add an ip to the banned ip list by clicking the add button.

Choose the **Ban Type**

Address/ Range – Enter the ip or range of ip's that need to be banned

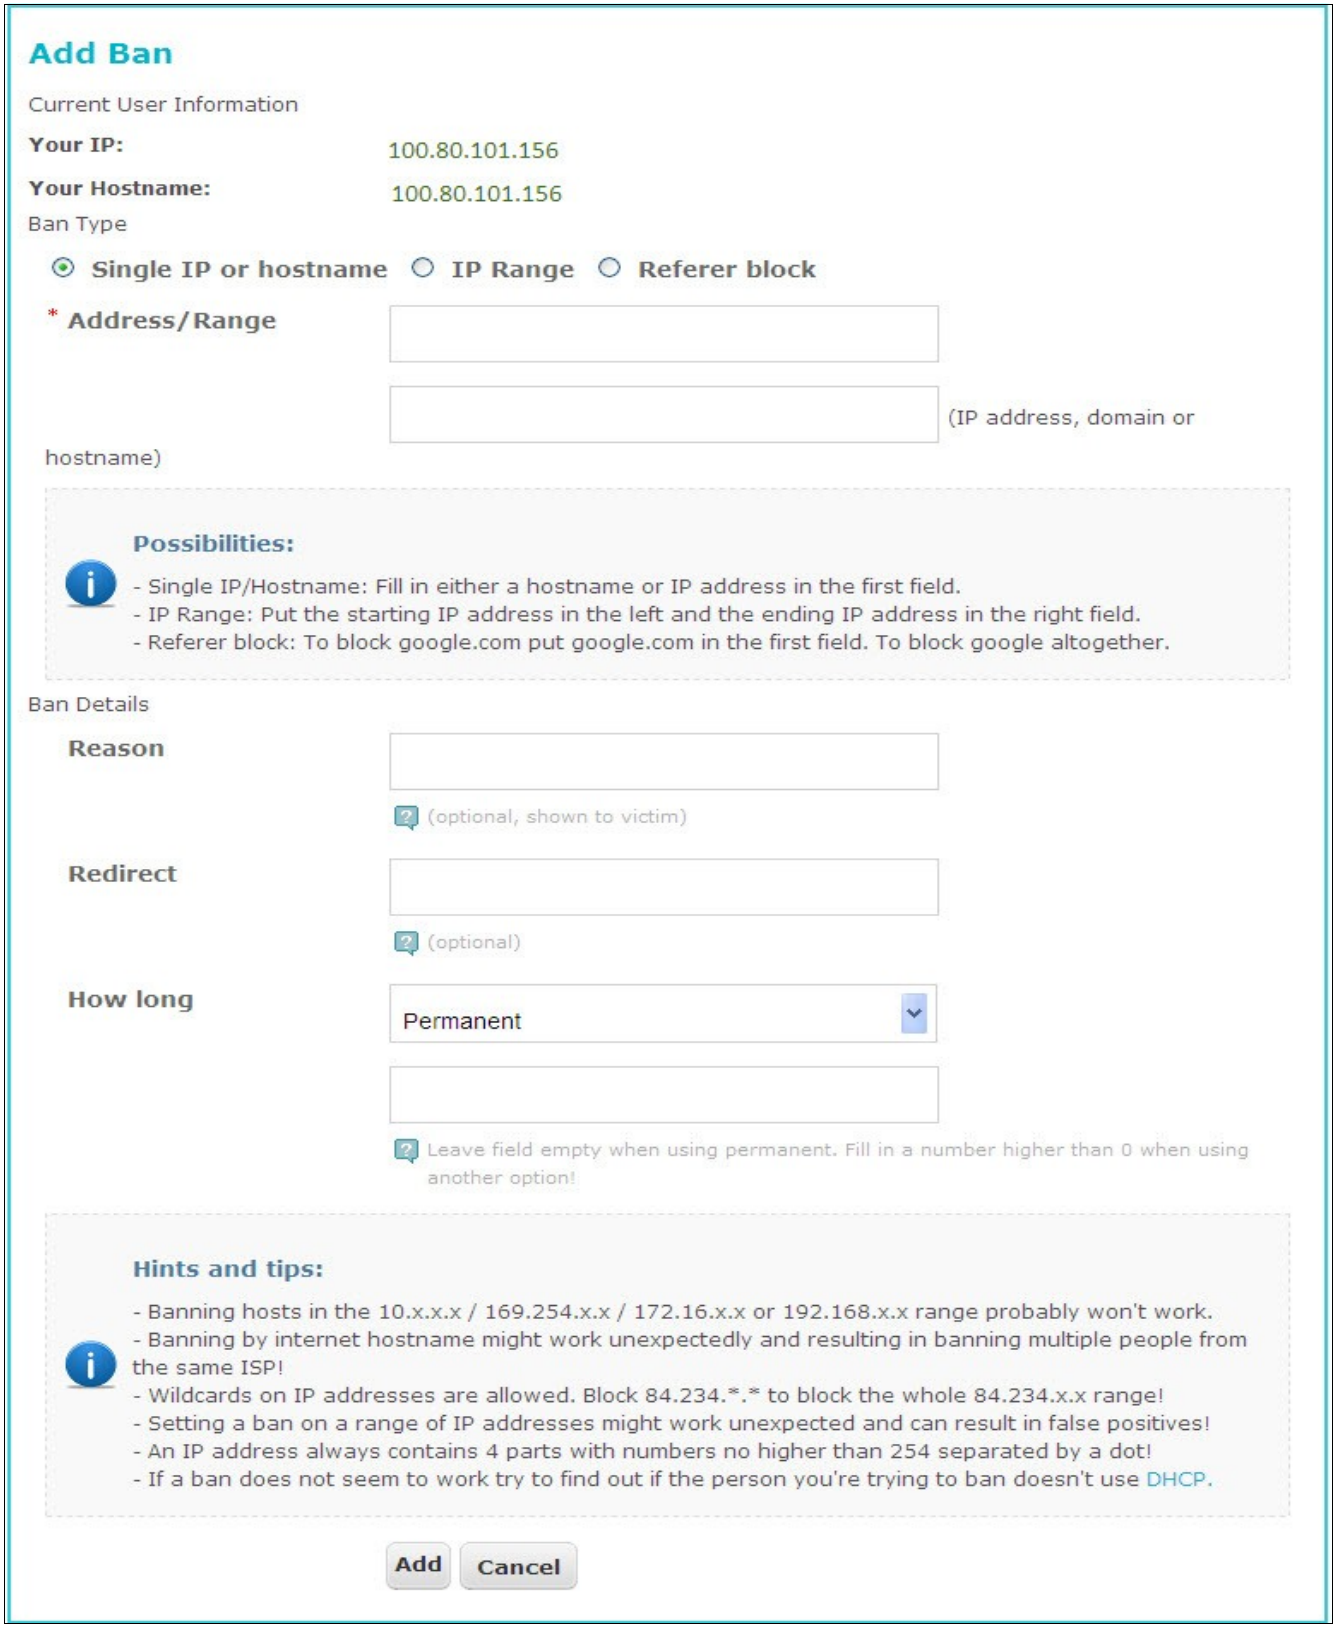
Reason – Text box to state the reason why the user is banned

Redirect to - Where the user will be redirected to if he tries to login

How long – The admin can set the Ban period for the ip

It may be permanent, for days and weeks. The admin would have to enter number of days or weeks in the text box below and leave blank for permanently banned ip.

Click Add to add the ip to Banned list



Add Ban
Current User Information
Your IP:
100.80.101.156
Your Hostname:
100.80.101.156
Ban Type
Single IP or hostname
IP Range
Referer block
* Address/Range
(IP address, domain or hostname)
Possibilities:
- Single IP/Hostname: Fill in either a hostname or IP address in the first field.
- IP Range: Put the starting IP address in the left and the ending IP address in the right field.
- Referer block: To block google.com put google.com in the first field. To block google altogether.
Ban Details
Reason
(optional, shown to victim)
Redirect
(optional)
How long
Permanent
Leave field empty when using permanent. Fill in a number higher than 0 when using another option!
Hints and tips:
- Banning hosts in the 10.x.x.x / 169.254.x.x / 172.16.x.x or 192.168.x.x range probably won't work.
- Banning by internet hostname might work unexpectedly and resulting in banning multiple people from the same ISP!
- Wildcards on IP addresses are allowed. Block 84.234.*.* to block the whole 84.234.x.x range!
- Setting a ban on a range of IP addresses might work unexpected and can result in false positives!
- An IP address always contains 4 parts with numbers no higher than 254 separated by a dot!
- If a ban does not seem to work try to find out if the person you're trying to ban doesn't use DHCP.

23States

This page shows up the list of States added to the website. By default the page displays the Approved records. The states are categorized based on their status Approved or Disapproved.

Approved Records – This page just shows the states that are approved

Disapproved records – This page just shows the states that are disapproved

Total records – This page shows both approved and disapproved records together.

Information displayed in this page are

- **Status** of the state(Approved)
- **Country name**
- **State name**
- **Code** for the state
- **Adml code**
- Hover the mouse over a State information to see the option to Edit and Delete the State
- **More Actions** drop down menu to delete, Approve, disapprove more than one state at a time

Other than the above information there is an option to **Search** a State using **keyword** and **Add a State**.

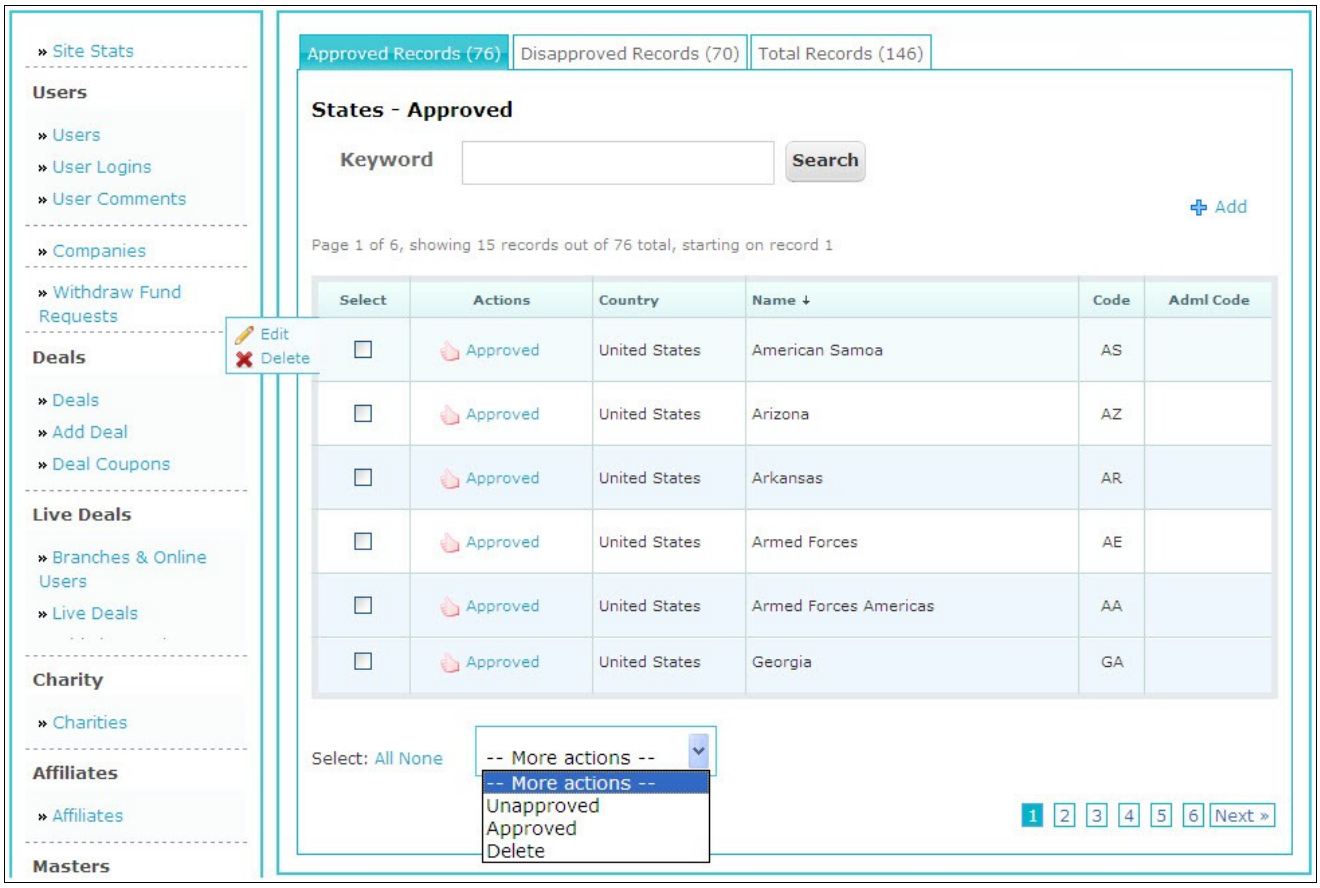

Figure -23 States

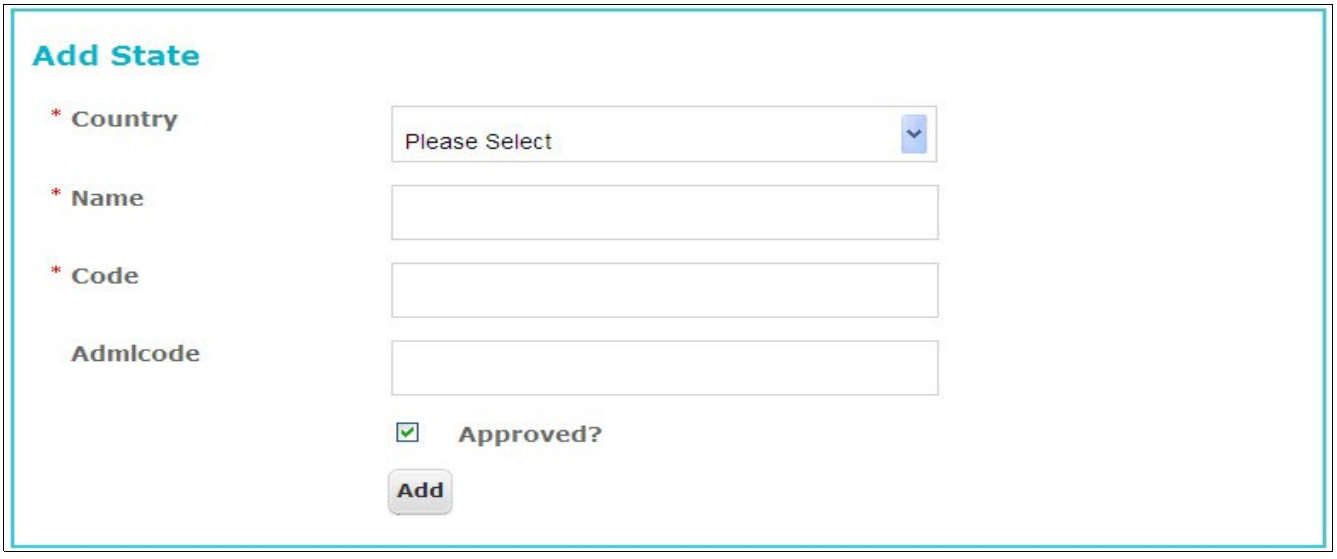

Figure -23.1 States

24Countries

This page shows up the list of countries added to the website. Information displayed in this page are

- **Name** of the country
- **FIPS 10-4 code** - American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange. It is a two letter code.

ISO2, ISO3 and ISO n are International codes used to represent the names of countries. prepared by the International Organization for Standardization.

- **ISO2**- It is a Two letter country code

ISO 3166-1 alpha-2 codes are two-letter country codes defined in ISO 3166-1, part of the ISO 3166 standard published by the International Organization for Standardization (ISO), to represent countries, dependent territories, and special areas of geographical interest.

- **ISO3**- Three letter country code

ISO 3166-1 alpha-3 codes are three-letter country codes defined in ISO 3166-1, part of the ISO 3166 standard published by the International Organization for Standardization (ISO), to represent countries, dependent territories, and special areas of geographical interest. They allow a better visual association between the codes and the country names than the two-letter alpha-2 codes (the third set of codes are numeric and hence offers no visual association).

Figure – 24 Countries

- **ISO n**- Numeric code for countries

ISO n is a three-digit country codes which are identical to those developed and maintained by the United Nations Statistics Division, with the advantage of script (writing system) independence, and hence useful for people or systems using non-Latin scripts.

- **Internet** - Two character codes used to identify countries on the internet.
- **Capital** of the country
- **Map reference** - Helps the people to identify the where the country is located. Most probably the continent where the country located is given as map reference. Oceania is the map reference given for the islands of southern, western, and central Pacific Ocean

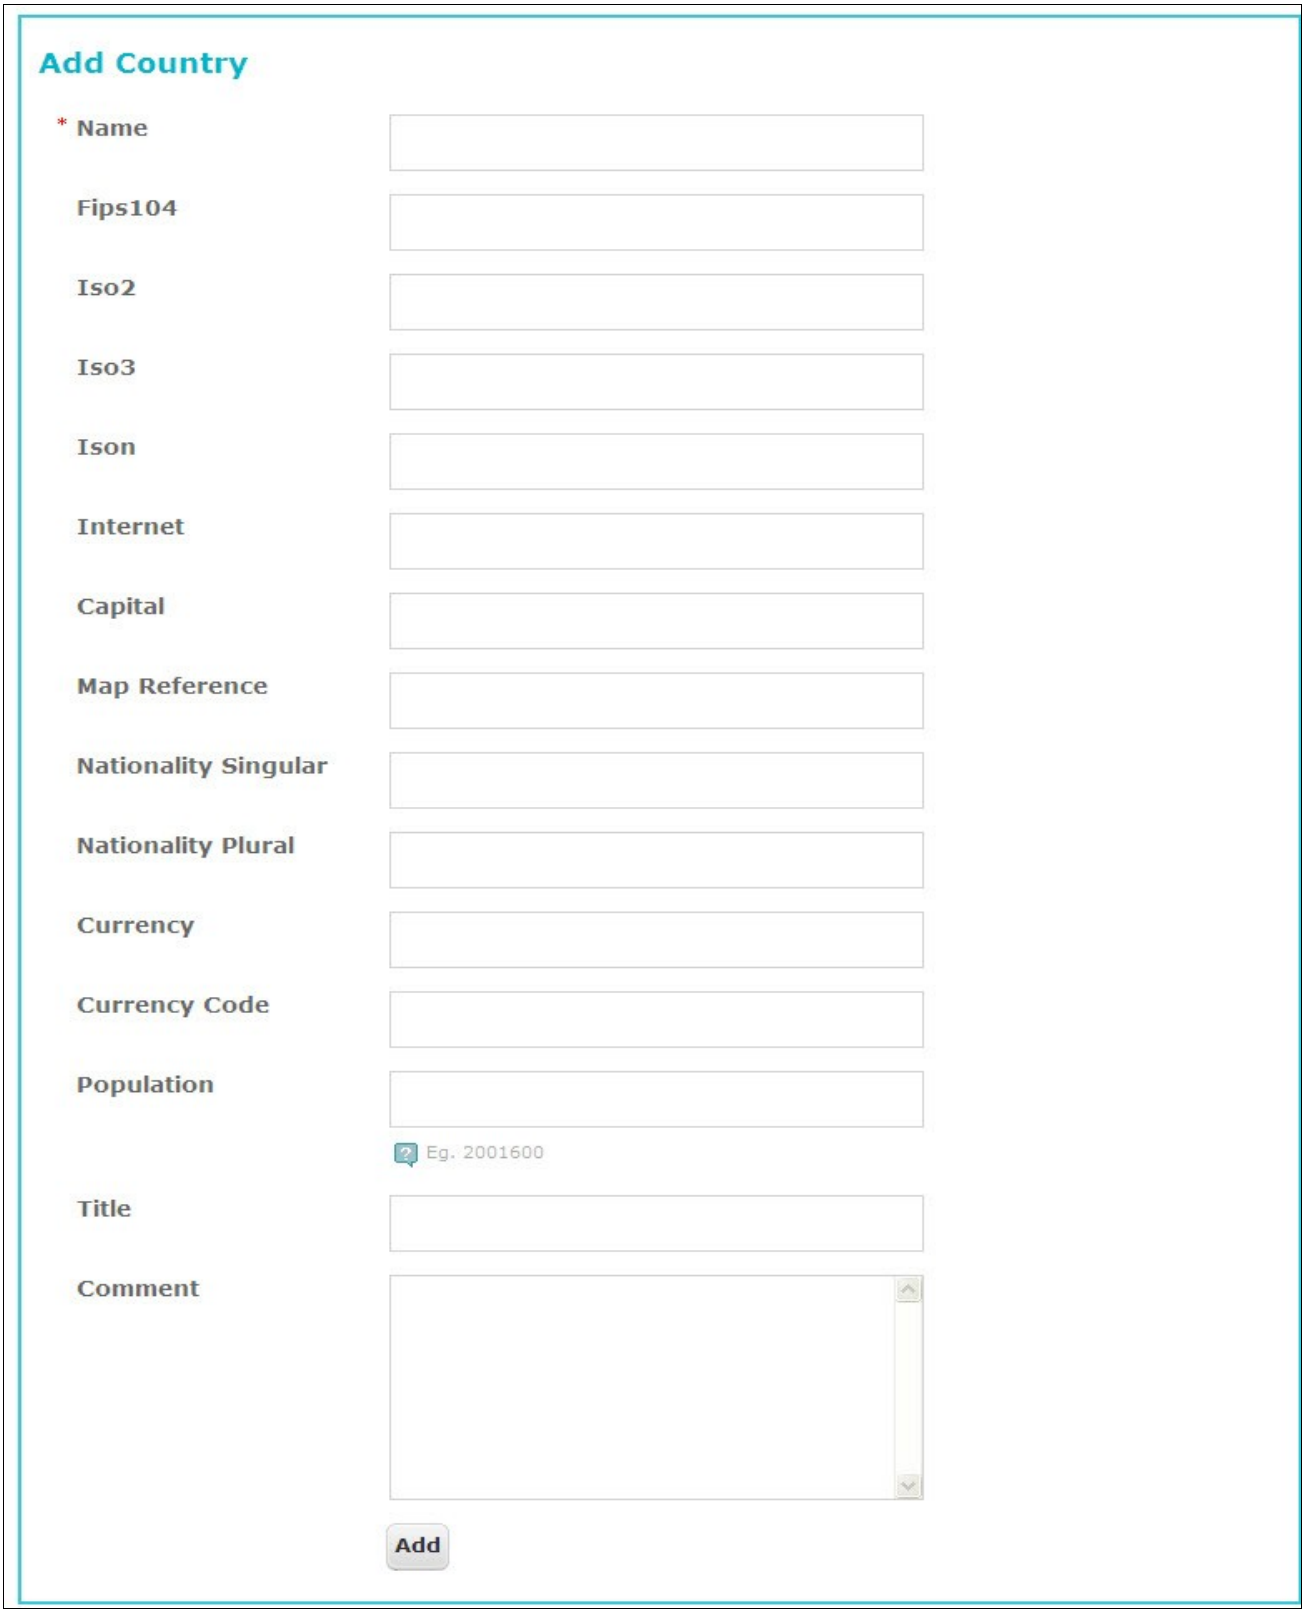

Figure -24.1 Add Country

- **Nationality** (Singular and plural)

Consider the country India the singular nationality is Indian and plural nationality is Indians

- **Currency** used in the country and currency code
- Hover the mouse over a country information to see the option to Edit and Delete the country.
- More Actions drop down menu to delete more than one country

Other than the above information there is an option to search a country using keyword, Add a country.
